AssistMyTeam EML to PDF Converter

Installation and Configuration
('Per User Installation' and 'Per Machine Installation')

With this guide, you would be able to quickly install and easily configure AssistMyTeam EML to PDF Converter in your system, and effortlessly generate PDF documents from emails and attachments in your EML files.

For **'Per User Installation'** *(ideal for standalone single user/workstation)*
EmlToPdfSetup.zip

For **'Per Machine Installation'** *(ideal for installing on Citrix and Terminal Servers)*
EmlToPdfSetup-Citrix.zip

Extract these file contents to a folder.

NOTE: 'Per User Installation' and 'Per Machine Installation'

In 'Per User Installation'*, the install is performed 100% on the local system and nothing is installed on your Exchange or Windows Server. Further, this install is intended to serve only the current logged on user of the system/workstation and will be installed under the user's application data folder (instead of Programs Files folder) and no elevated permission is required. So, there won't be a prompt from UAC to allow this install unless you change the install directory to say, Programs Files which will warrant an elevated permission/UAC prompt. If the same system is used by multiple users, each one needs to install the app on their profile with the default installation folder location.*

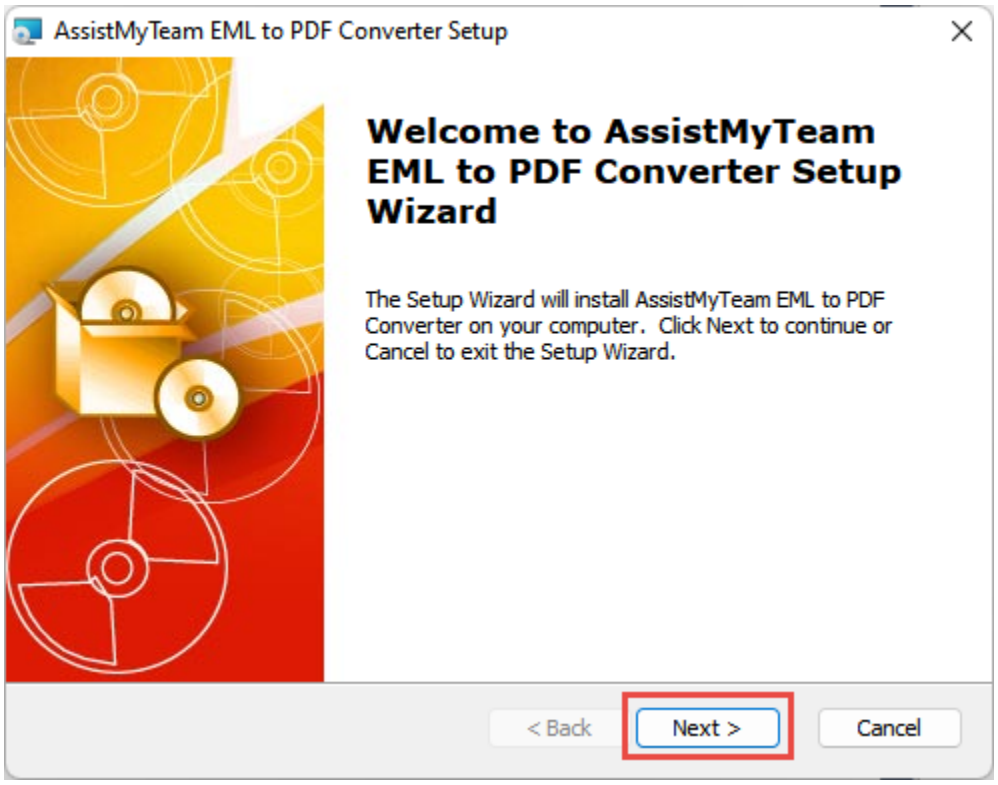

'Per Machine Installation': *If you have the need to have a single install that serves all users of the system (i.e., the files will be installed under Program files, download the Citrix/Terminal Server version of the setups to perform a per machine installation.*

Requirements:

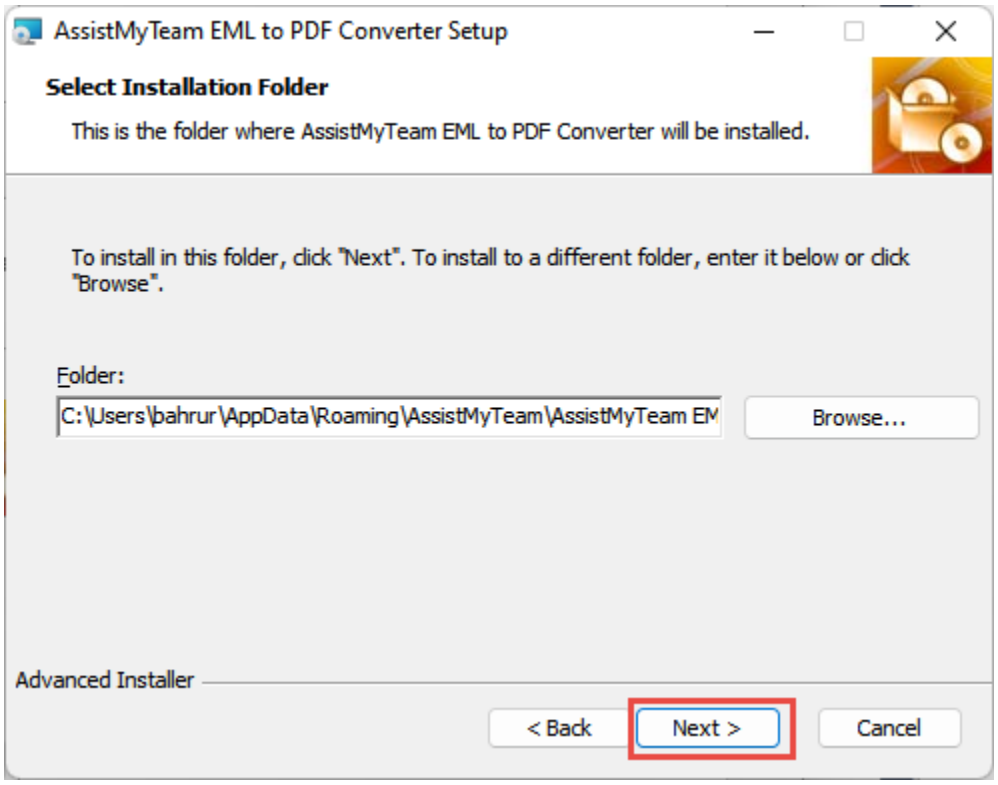

- *Microsoft .NET framework 4.8*
- *Windows 11, Windows 10, Windows 8.1, Windows 8, Windows 7, Windows Vista (both 32bit and 64bit are supported) and all server-based Windows 2012 and above.*

Step 1. Run the **Setup.exe** to start the installation. Click '**Next**' to Continue.

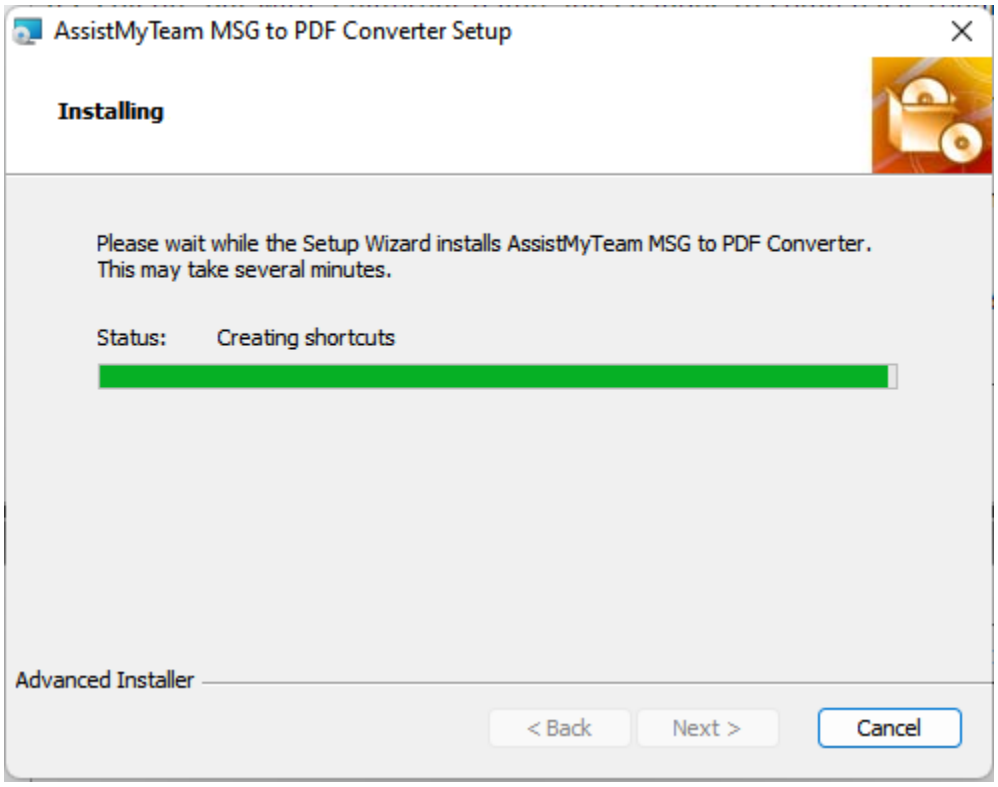

Step 2. Select the appropriate destination folder where the application files will be installed. If you change the default folder path, please make sure you have appropriate permission.

Now go to Start Menu > All Apps. If the installation was successful, you will see new menu entry 'AssistMyTeam EML to PDF Converter'.

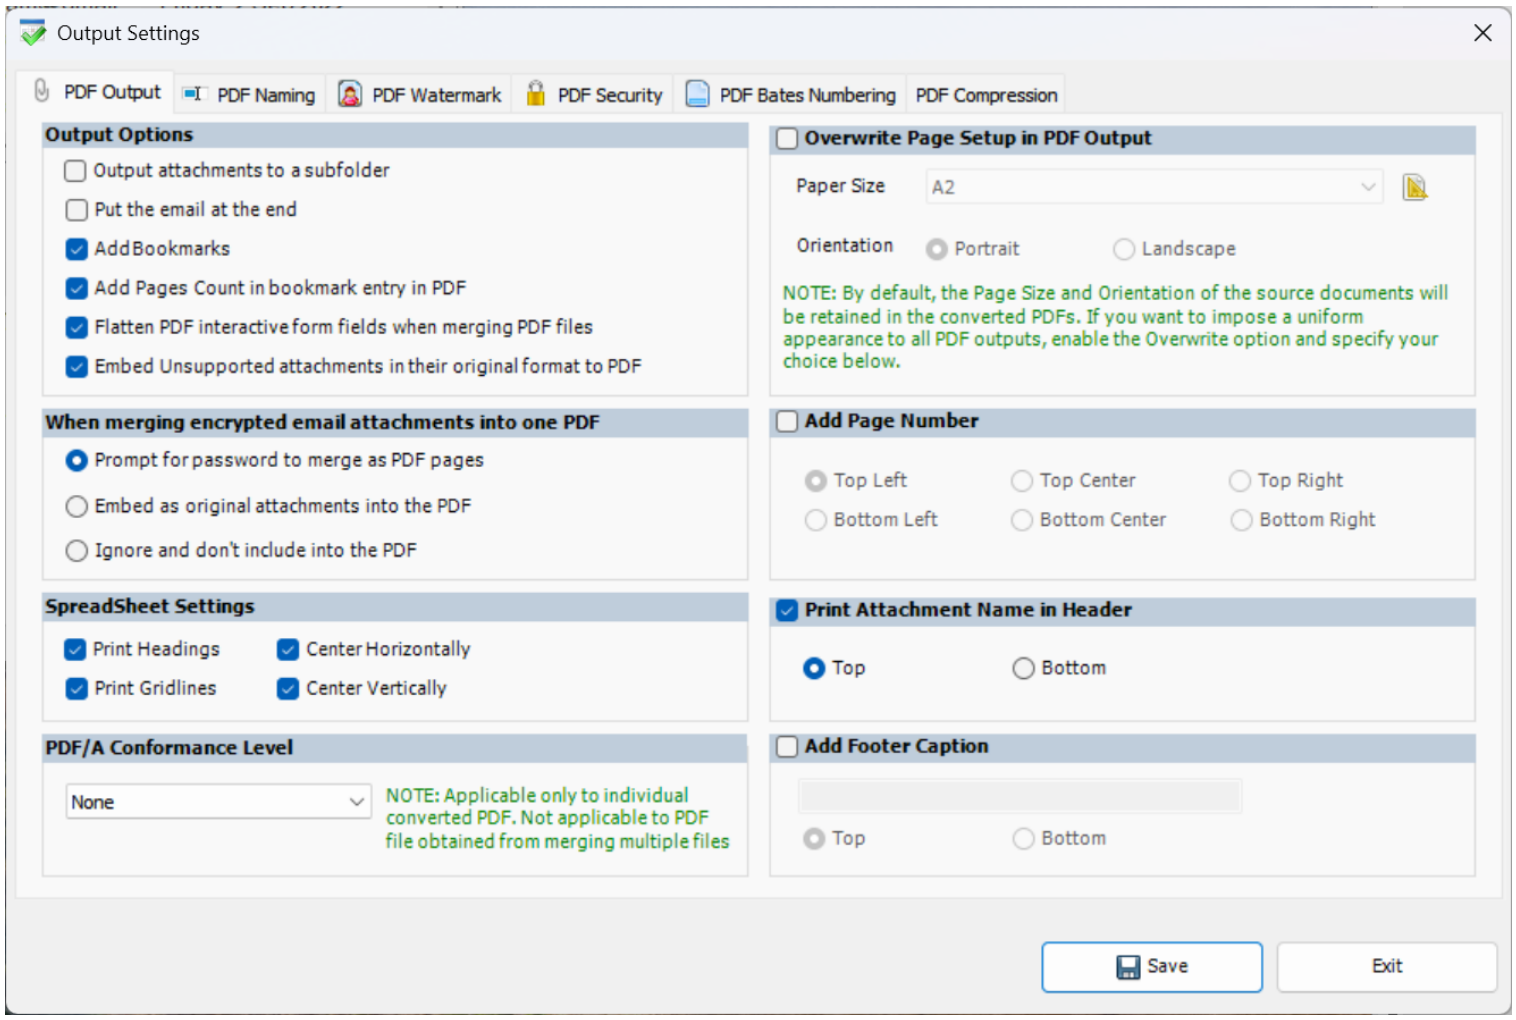

To run the EML to PDF Converter app, click 'AssistMyTeam EML to PDF Converter' from the menu under 'All Apps'. This will load and display the main interface of the converter app.

To configure the output settings for PDF from emails and attachments, click the 'Settings' button. Within the settings dialog, you will find options to tweak and customize the default file naming scheme, specify the PDF output behavior, set watermark text or logo, set security password to be applied to PDF, modify the page setup, paper size, layout etc.
