- Automatically enforce consistent naming convention to replicated MBOX files.
- Retain the same original folders structure of your mailboxes in the disk for easy access, sharing and filing.
- All conversions and processing performed locally. Ideal for closed systems.
- Special MSI installer available for enterprise-wide deployment*.
- Support Windows 11, 10, 8, 7 and Windows Servers.

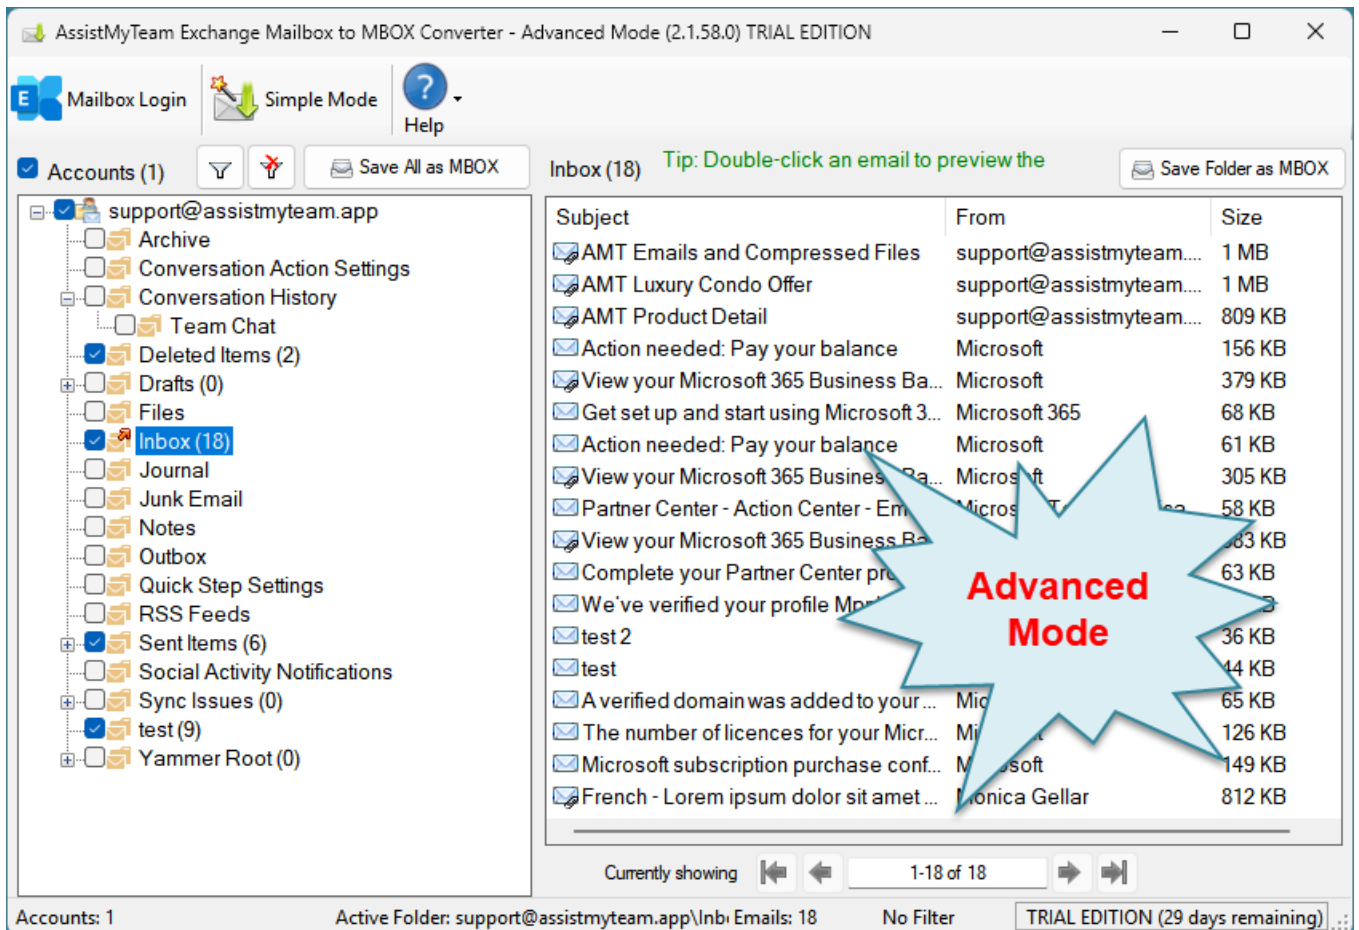

For a quick overview, refer [product website](#).

How It Works?

AssistMyTeam Exchange Mailbox to MBOX Converter can operate in two modes – **Simple** (default) and **Advanced**, which has an interactive user interface with many options to export emails to MBOX files.

Exchange Mailbox to MBOX Converter – Simple Mode

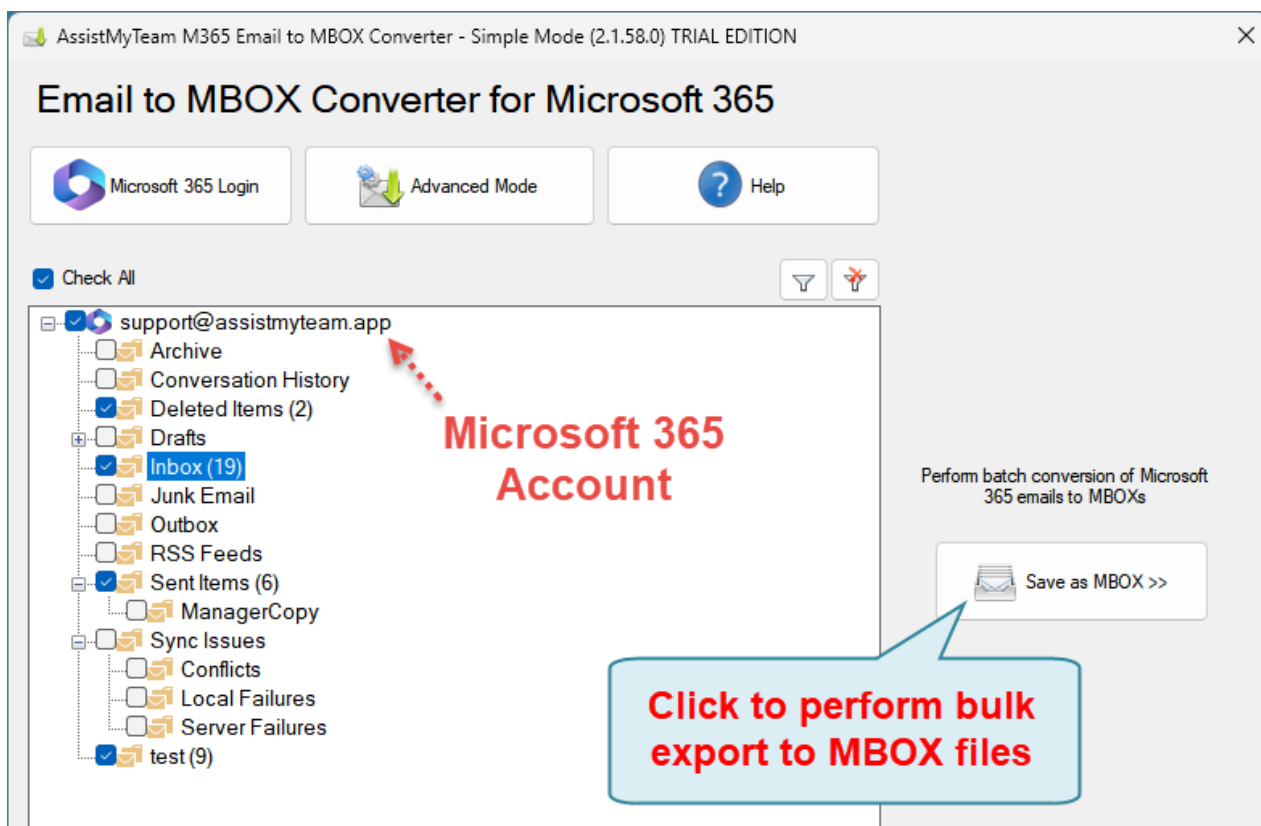

Exchange Mailbox to MBOX Converter – Advanced Mode

There are three ways to perform conversion with Exchange Mailbox to MBOX Converter:

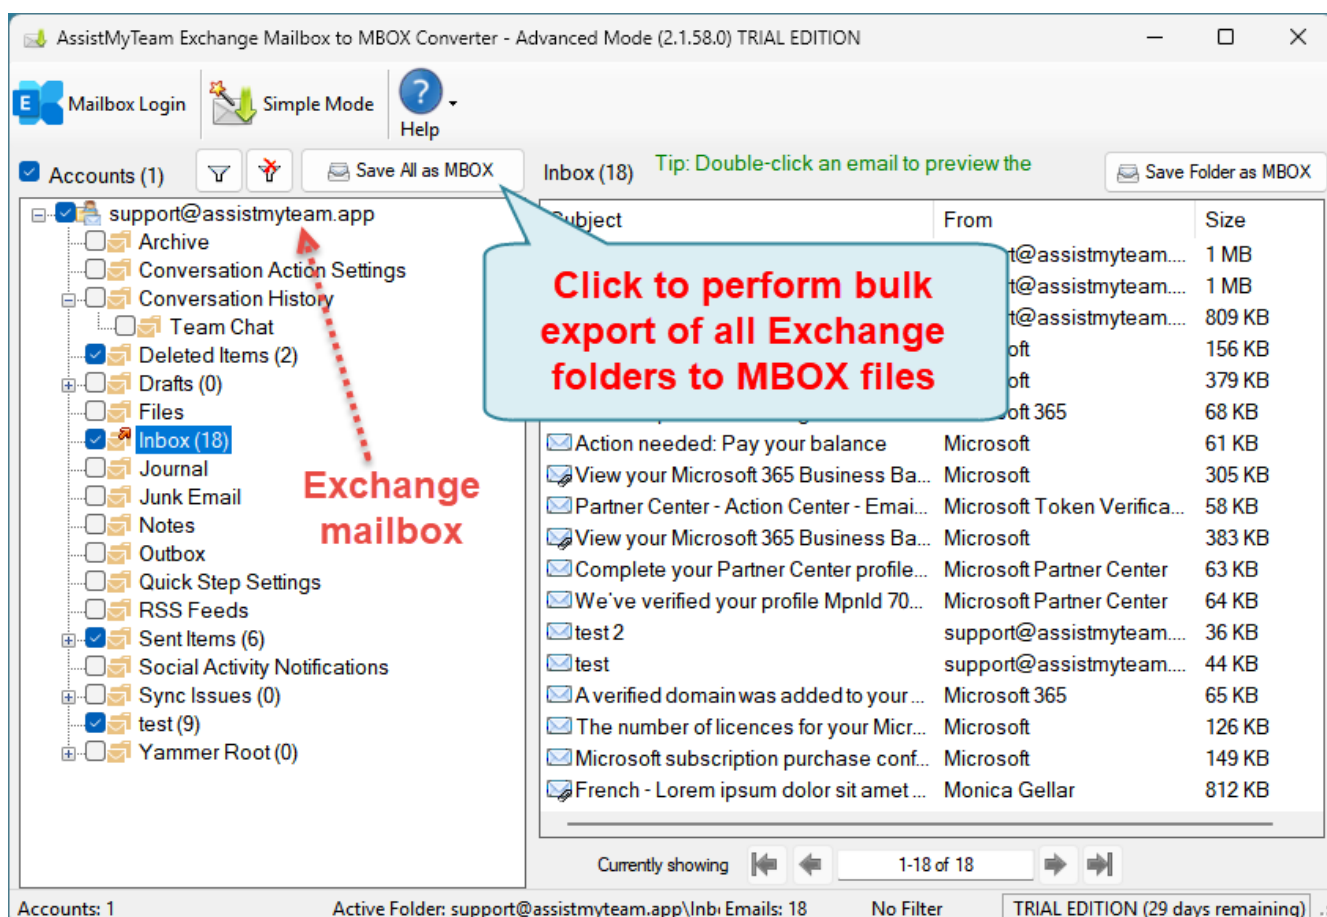

- A. Whole Exchange Mailbox Account to new MBOX files
- B. Chosen Exchange Mailbox Folder to existing or new MBOX file
- C. Chosen few emails to existing MBOX file

A. Convert whole Exchange Mailbox Accounts to MBOX files (bulk export)

In this mode, you can perform bulk export of the whole contents of each Exchange Mailbox account to MBOX format. Simply, click the 'Save All as MBOX' button option just above the tree-view control.

Bulk MBOX export in Simple Mode

Bulk MBOX export in Advanced Mode

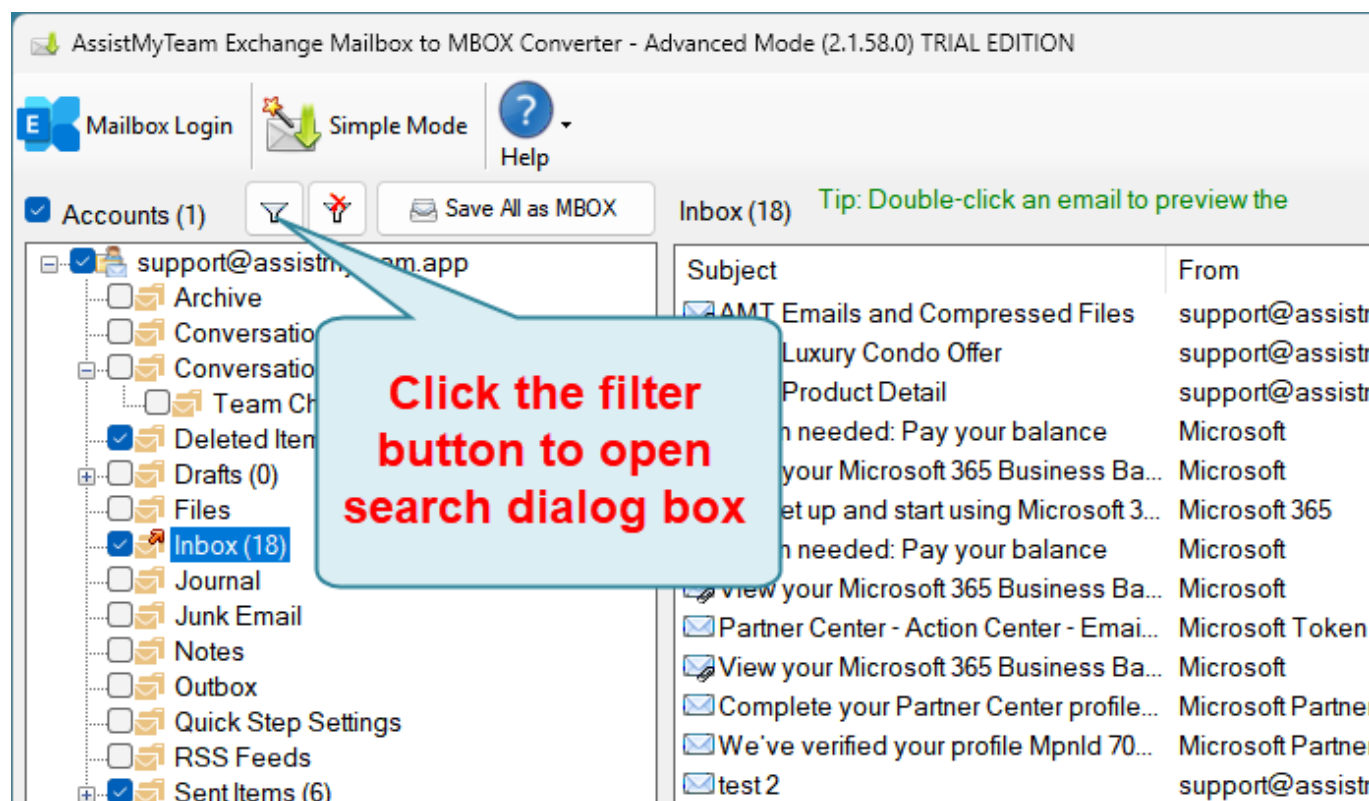

From the 'Browse for Folder' dialog box, choose a destination folder where the emails from your Exchange Inbox and other folders will be exported as MBOX files.

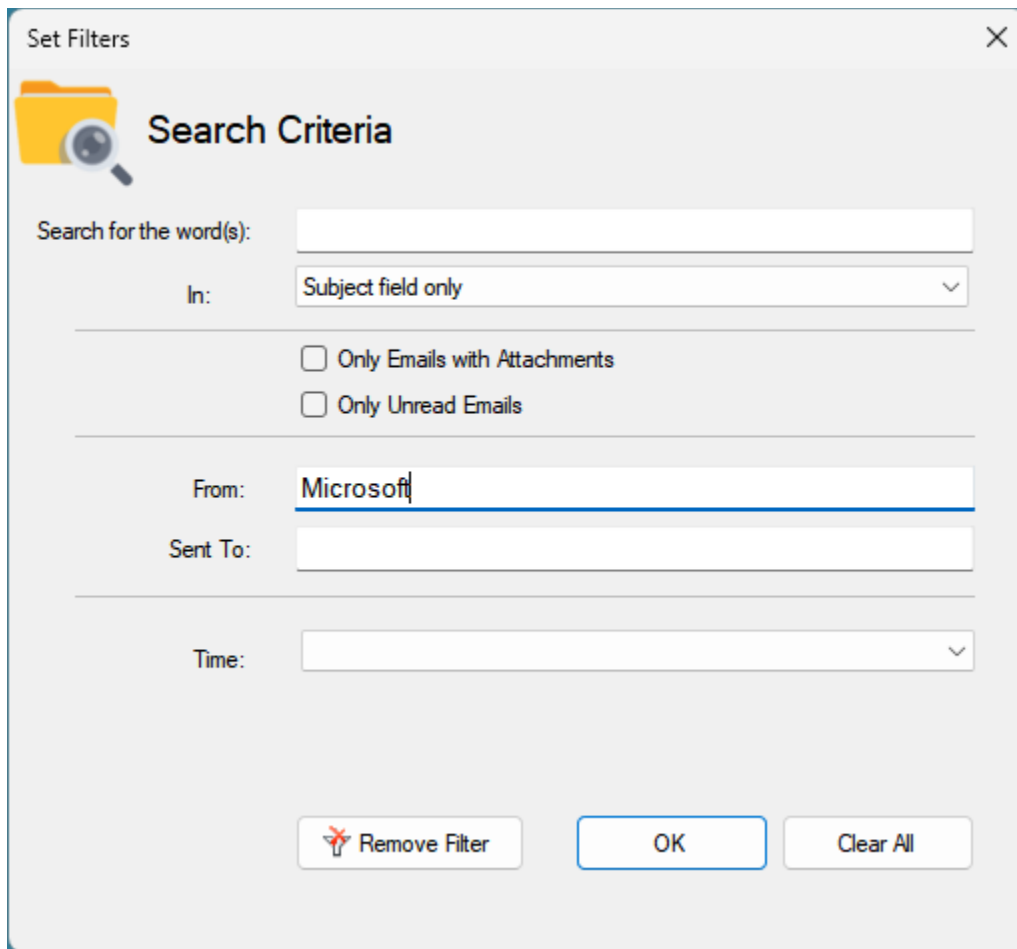

The app will recreate and retain the same original folders structure of your mailboxes in the selected destination folder of your computer to store the various exported MBOX email files for easy access, sharing and filing in your local computer.

Apply keywords search and filters

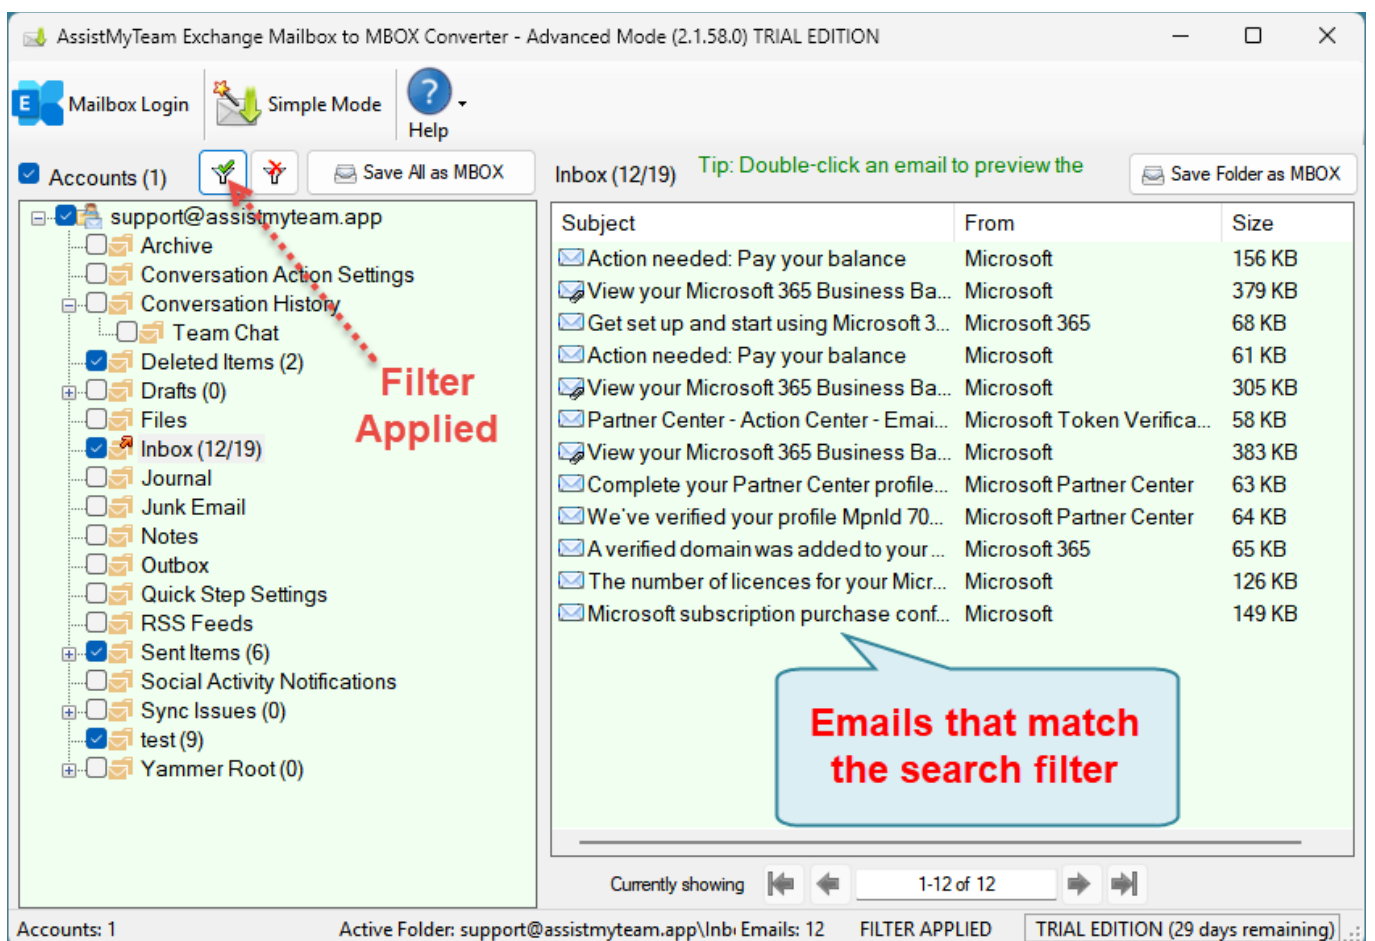

You can choose to perform a keyword search and apply filters and only perform the bulk conversions of those emails in the Exchange Mailbox account that fulfil the search parameters to MBOX. To do that, click the 'Filter' button available on top of the tree-view control box.

A dialog box for the search pop ups enabling you to input keywords search in the subject or body or both. You can also filter the emails by matching the sender in the 'From' field and/or the recipient in the 'To' field. Additionally, you can specify a time duration to restrict the emails that fall between the start and end date.

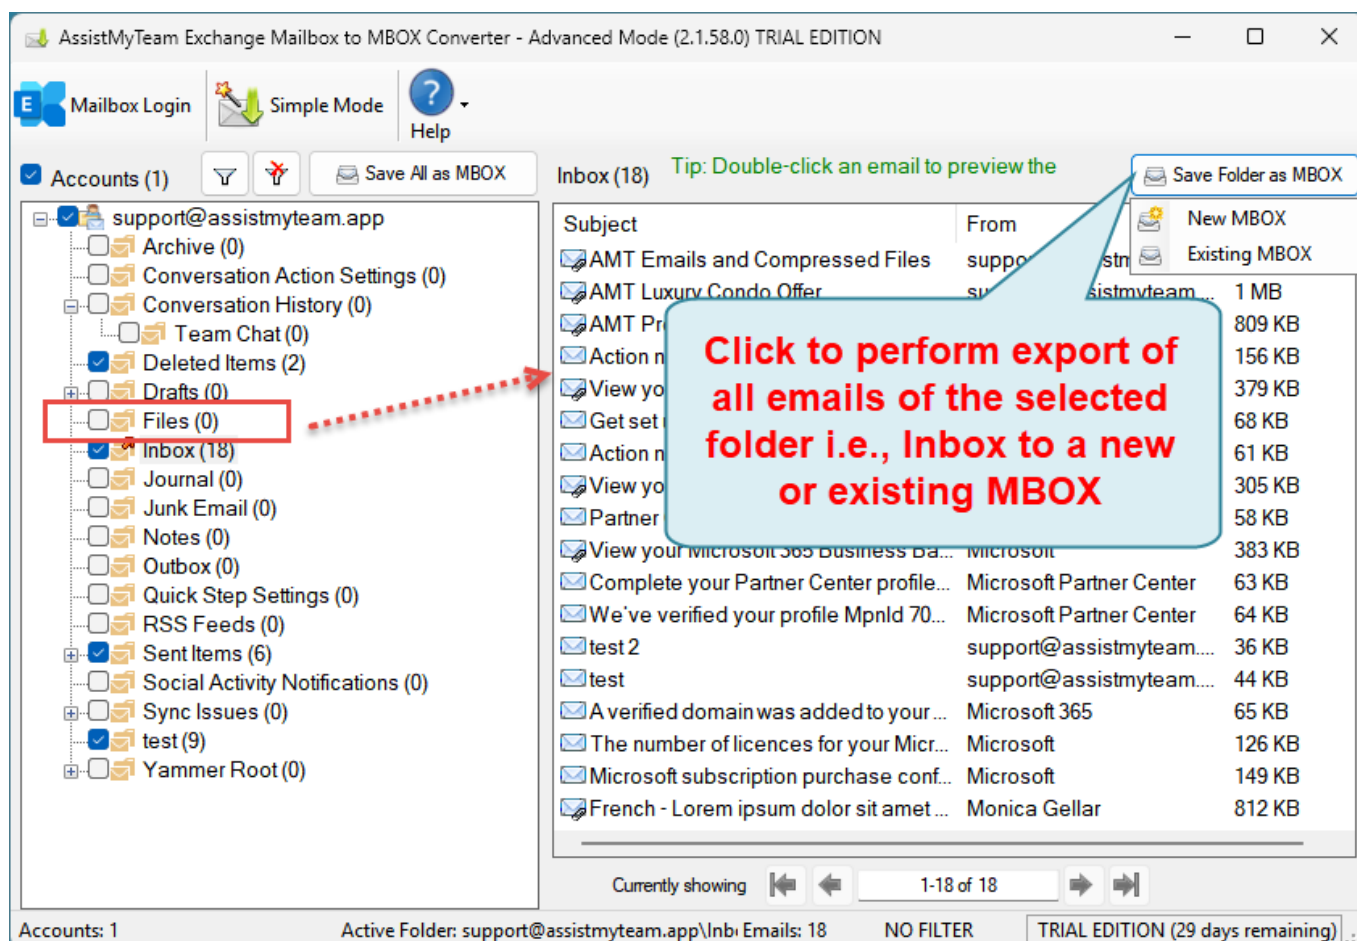

After applying the filters, the filter icon will change with a green tick mark, and the background colour of the email's container box will also be in green.

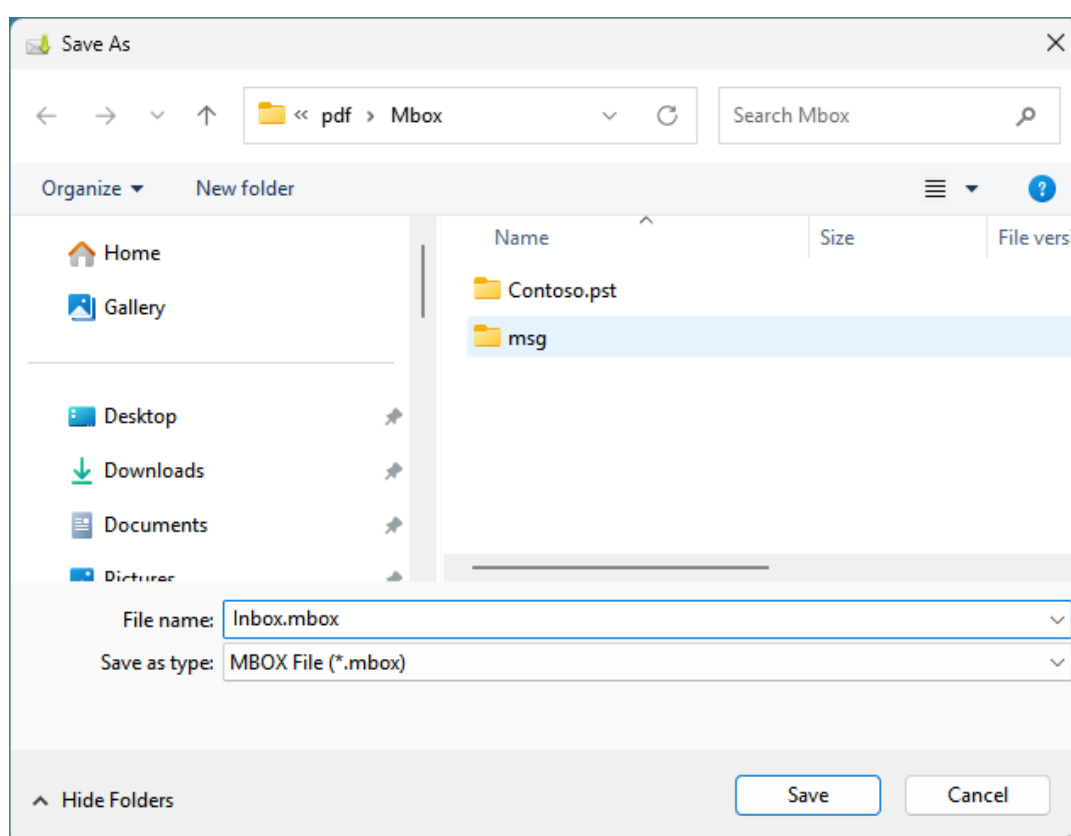

B. Export Emails of an Exchange folder to MBOX file (multiple export)

At times, what you may need is only to export emails of a particular folder within the Exchange Mailbox account, to an existing or a new MBOX file.

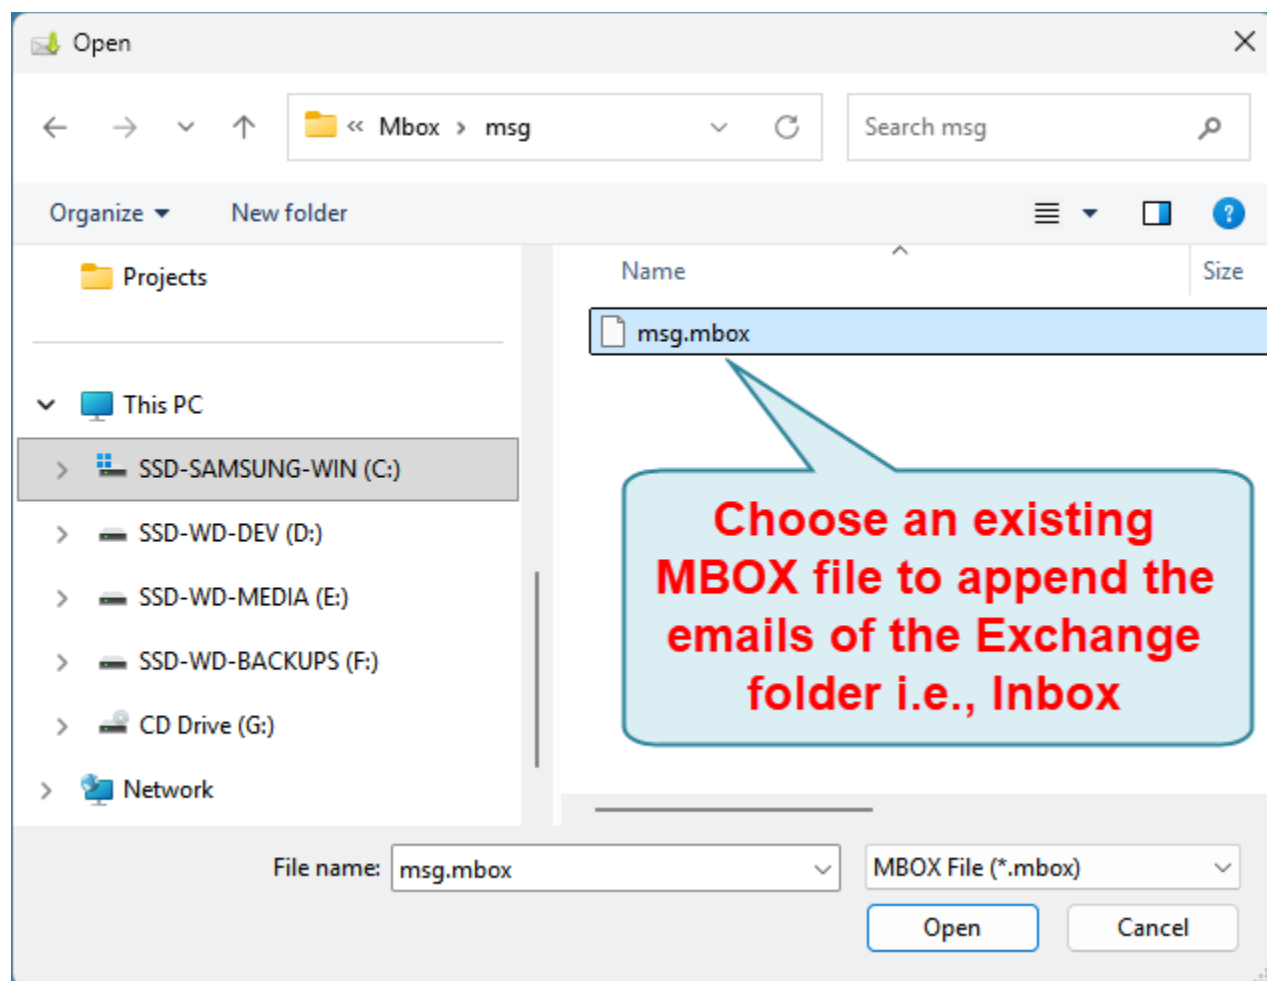

In such needs, you can perform the MBOX export by clicking the particular folder from the folders tree-view control box on the left side. This will show you all the emails in the folder view control on the right side. You can then proceed to click 'Save Folder as MBOX' button located on the extreme right corner of the folder view control.

If you choose to export all the emails of this particular folder to a new MBOX file, the app will prompt you to specify a destination folder where a new MBOX file will be created.

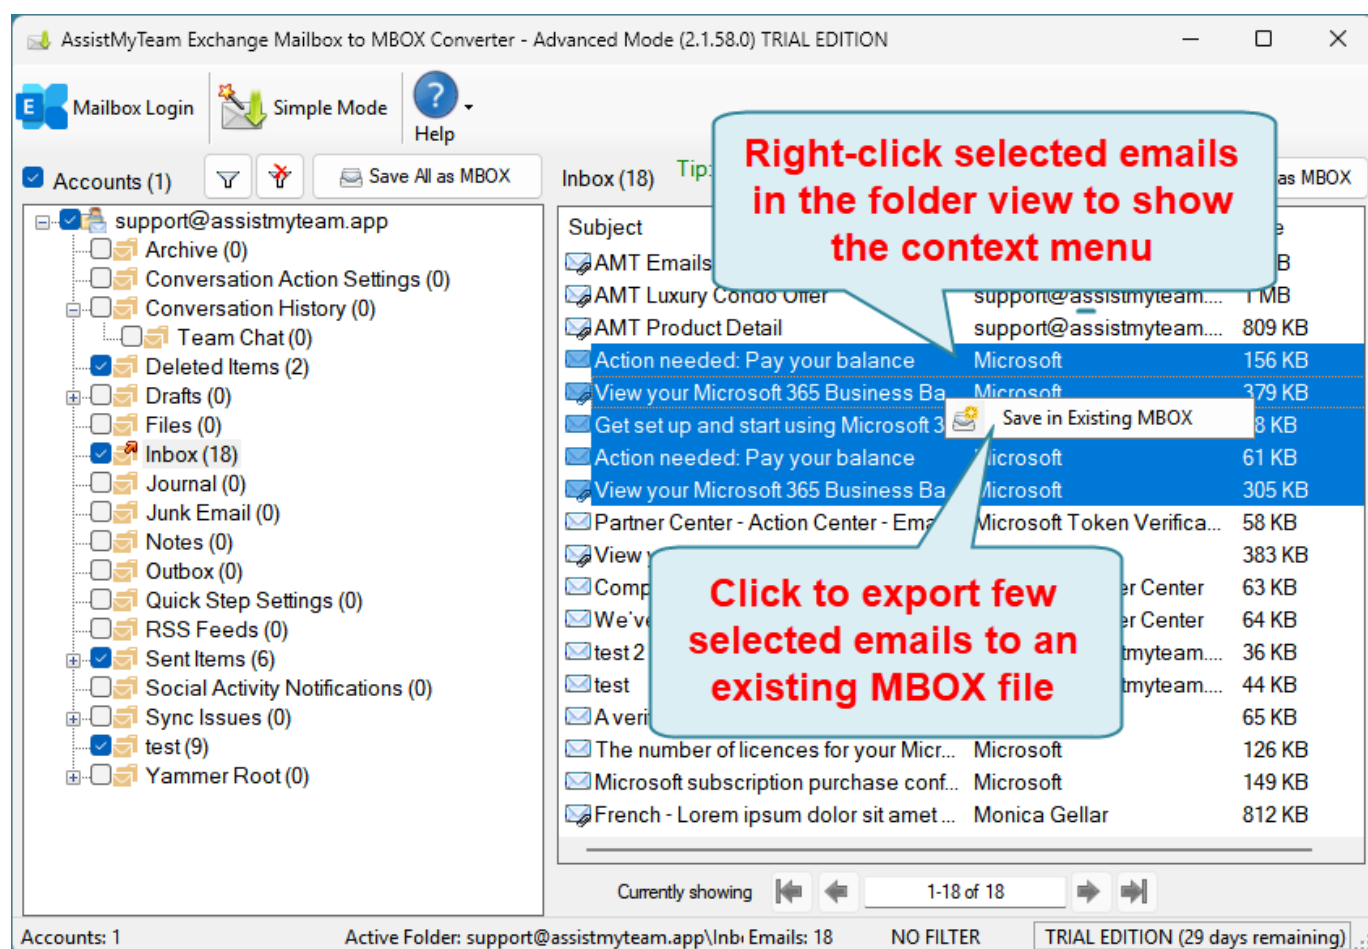

If you choose to export the emails of this particular mailbox folder to an existing MBOX file, you will be prompted to choose it from your computer.

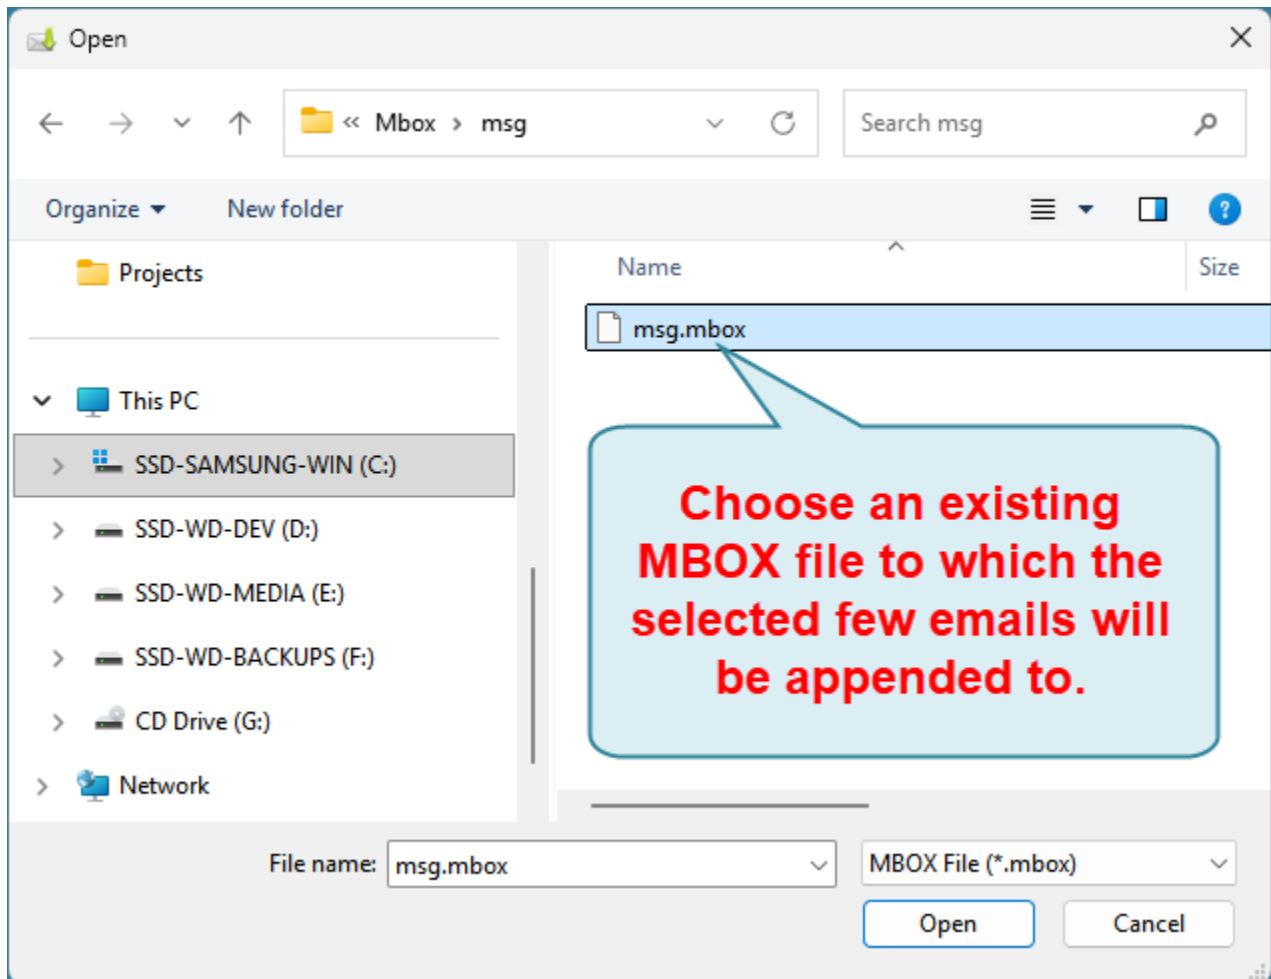

C. Export few selected emails to existing MBOX file

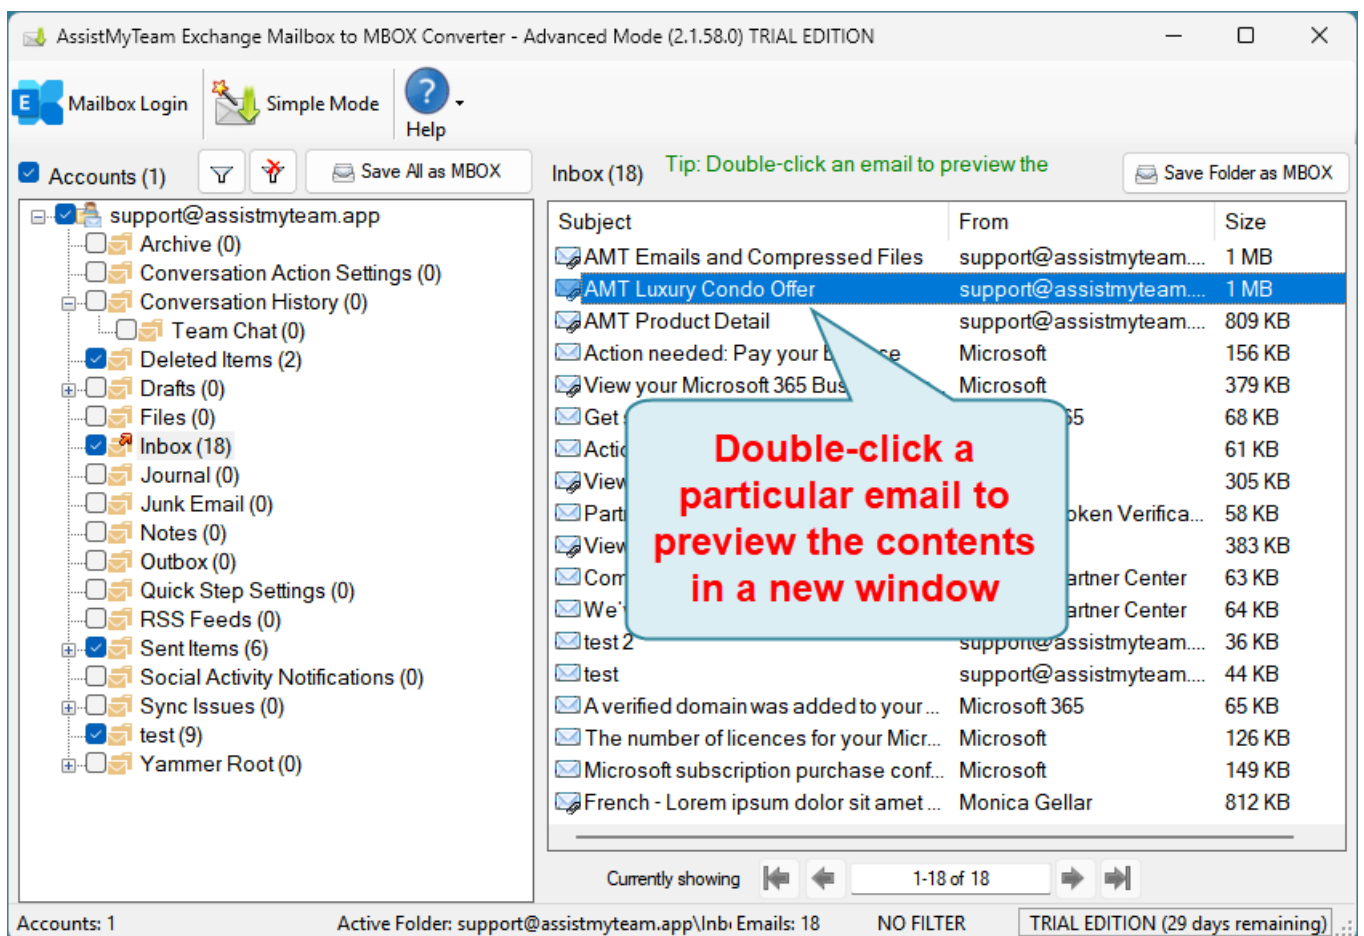

In this mode, you can export those few emails of interest to an existing MBOX file. To do this, select multiple emails of your interest from your Inbox and right-click to show the context menu 'Save in Existing MBOX'.

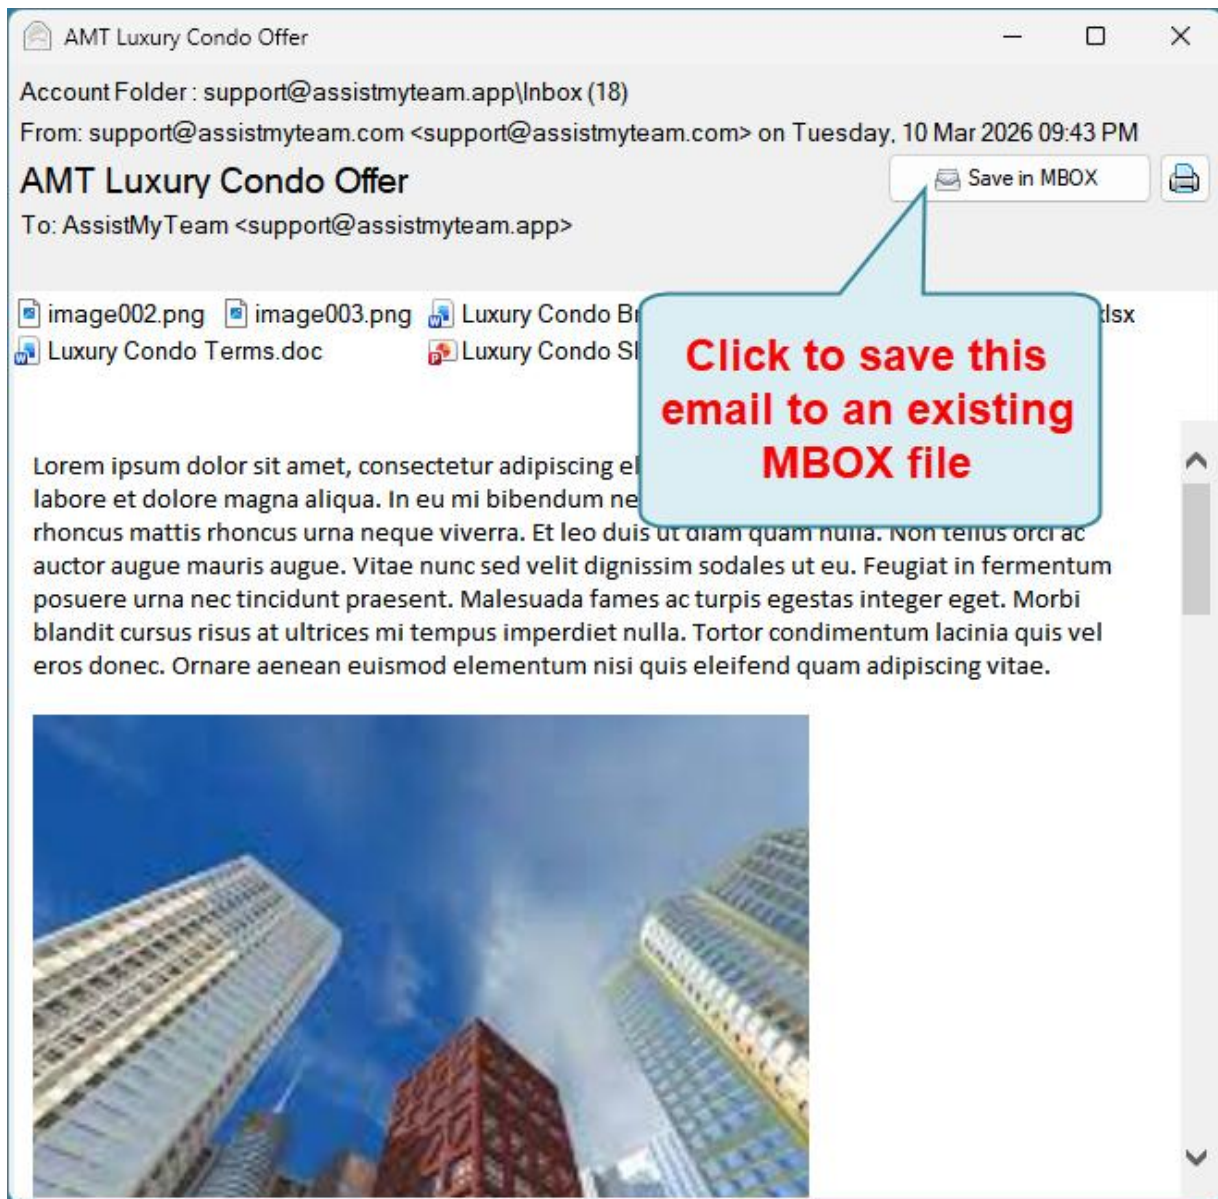

When you click it, you will be prompted to choose an existing MBOX file from your computer, to which the selected emails from your Exchange Inbox will be appended/exported.

Alternatively, you can preview the full content of a particular email, by double-clicking it from your Inbox folder.

This will show you the contents of the particular email in a new window.

And then choose to save the previewed email to MBOX by clicking the 'Save in MBOX' button located on the upper right side.
