- Automatically enforce consistent naming convention to replicated MSG files.
- Retain the same original folders structure of your Exchange mailboxes in the disk for easy access, sharing and filing.
- All conversions and processing performed locally. Ideal for closed systems.
- Special MSI installer available for enterprise-wide deployment*.
- Support Windows 11, 10, 8, 7 and Windows Servers.

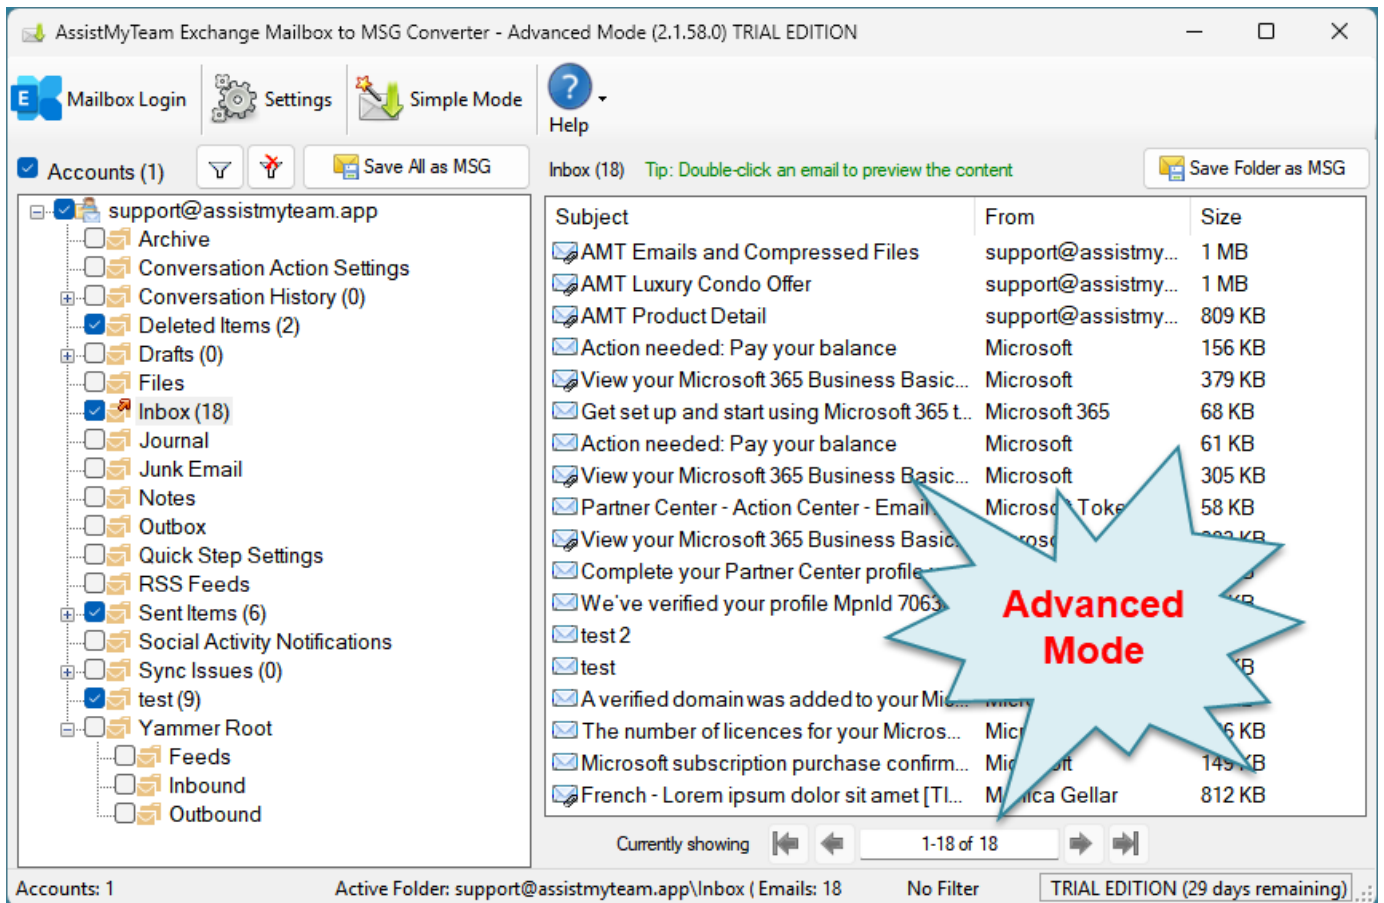

For a quick overview, refer [product website](#).

How It Works?

AssistMyTeam Exchange Mailbox to MSG Converter can operate in two modes – **Simple** (default) and **Advanced**, which has an interactive user interface with many options to export emails to MSG files.

Exchange Mailbox to MSG Converter – Simple Mode

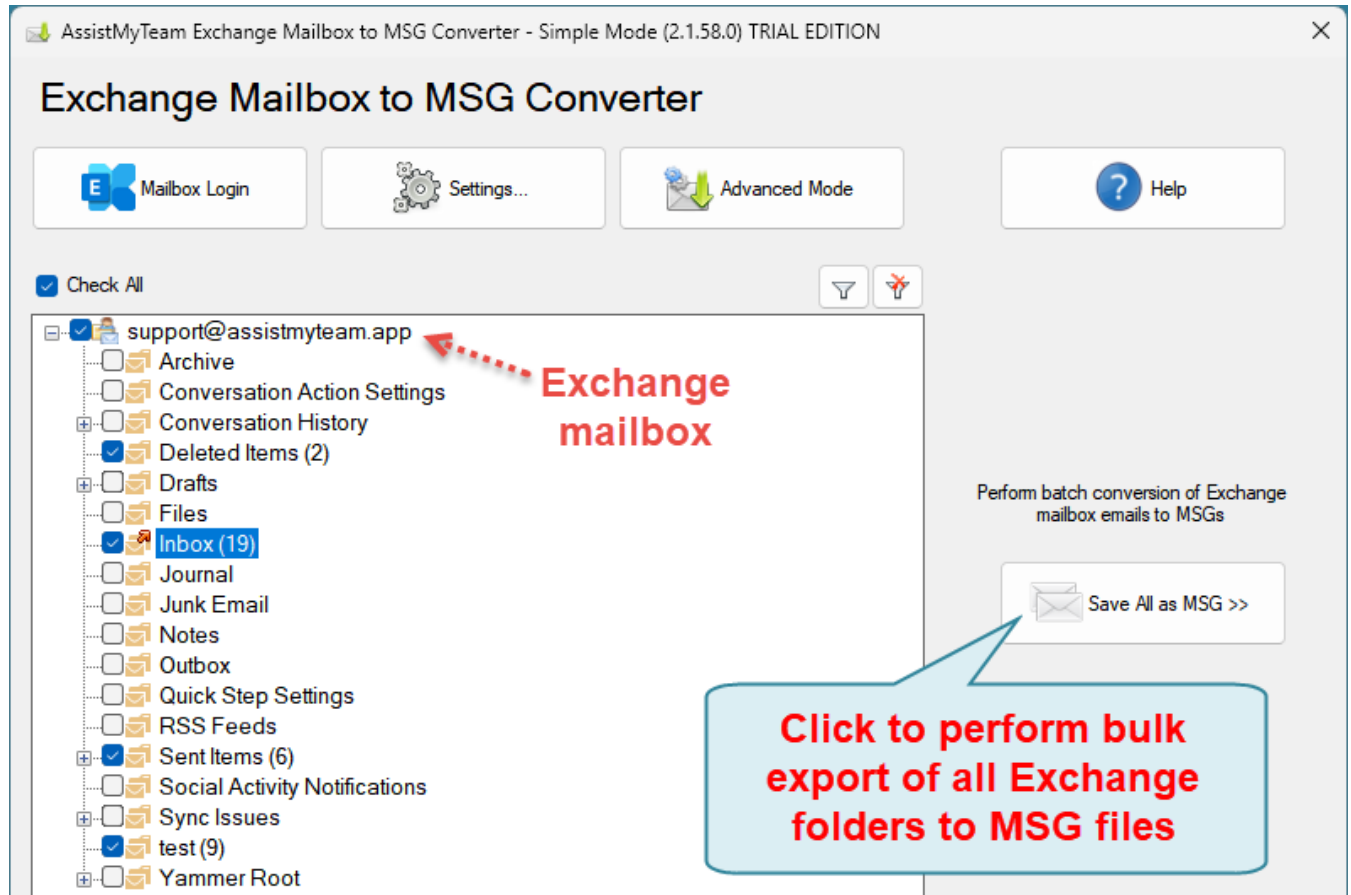

Exchange Mailbox to MSG Converter – Advanced Mode

There are three ways to perform conversion with Exchange Mailbox to MSG Converter:

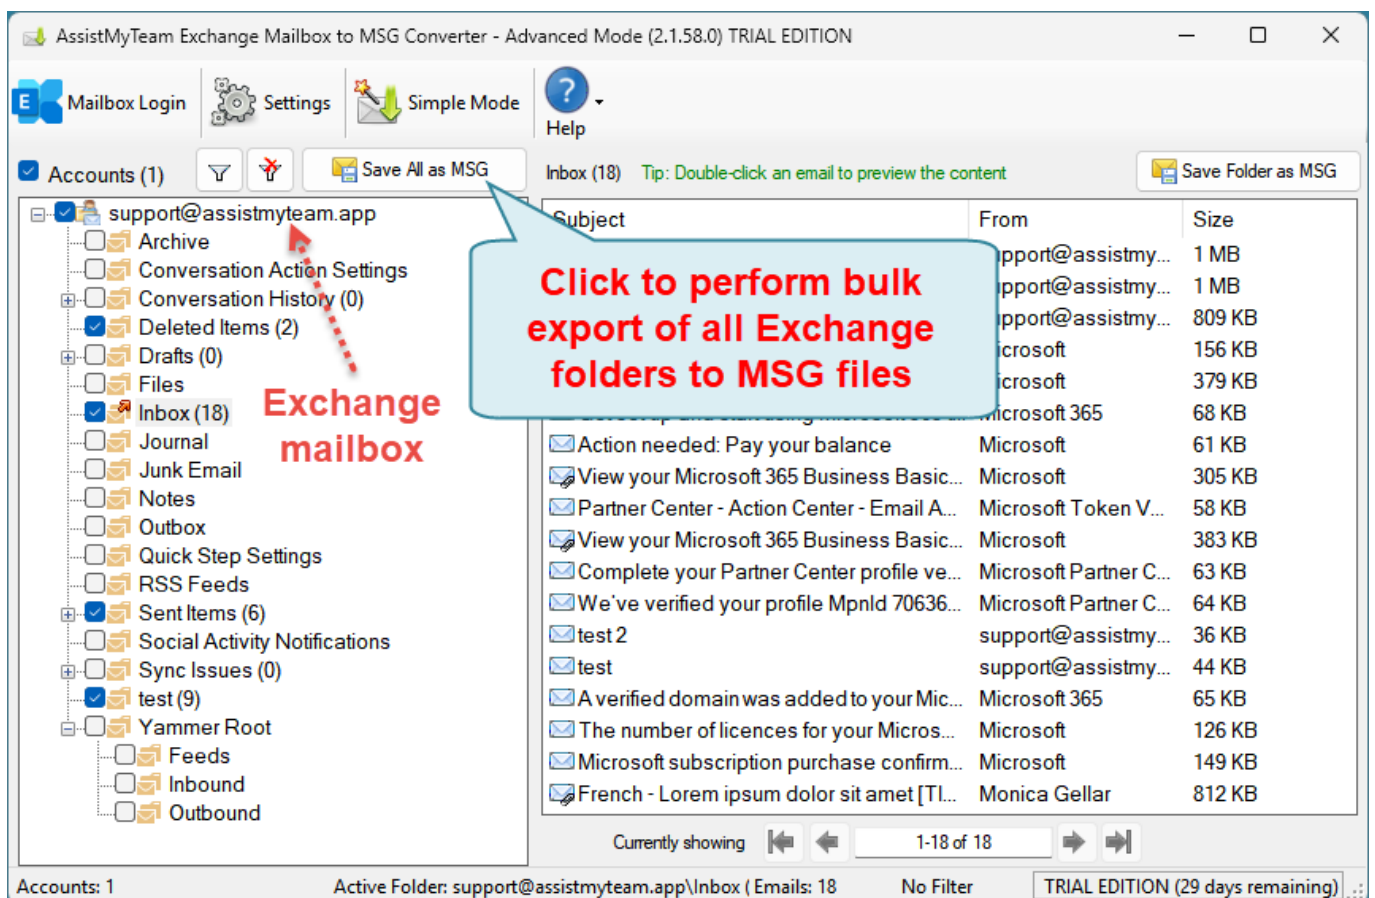

- A. Whole Exchange Mailbox Account to MSG
- B. Chosen Exchange Mailbox Folder to MSG
- C. Chosen few mailbox emails to MSG

A. Convert whole Exchange Mailbox Accounts to MSG (bulk conversion)

In this mode, you can perform bulk conversion of the whole contents of each Exchange Mailbox account to MSG format. Simply, click the 'Save All as MSG' button option just above the tree-view control.

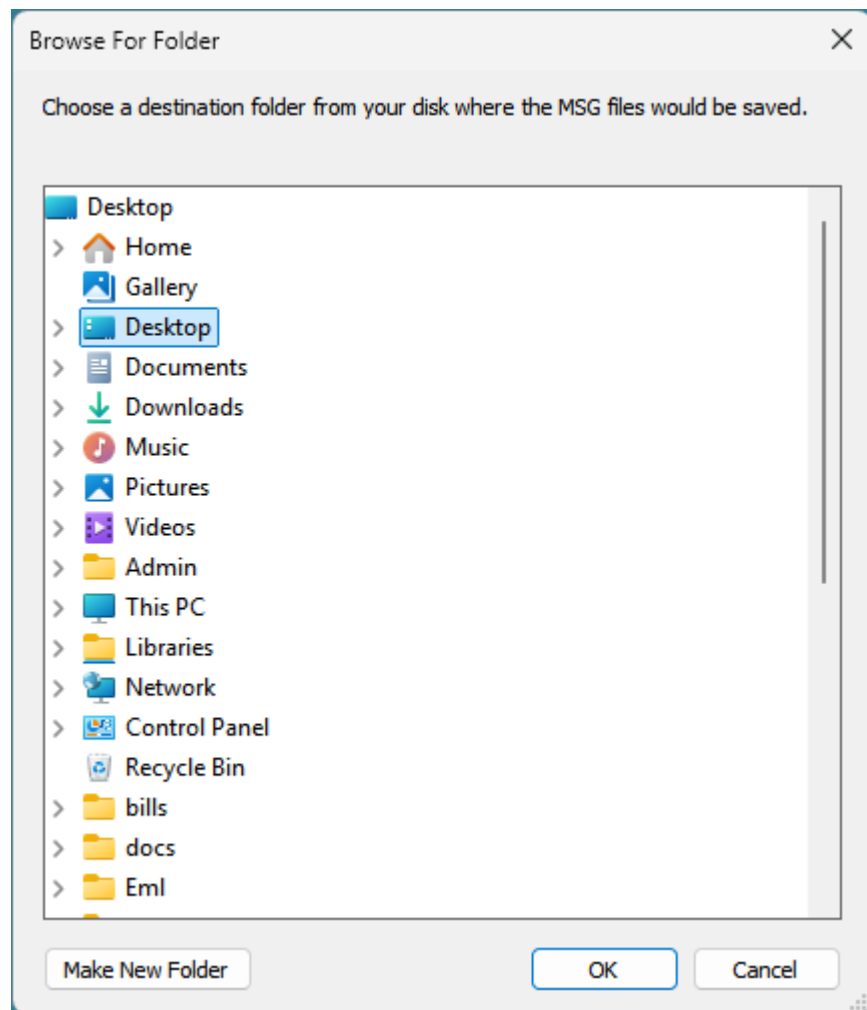

Bulk MSG Conversion in Simple Mode

Bulk MSG Conversion in Advanced Mode

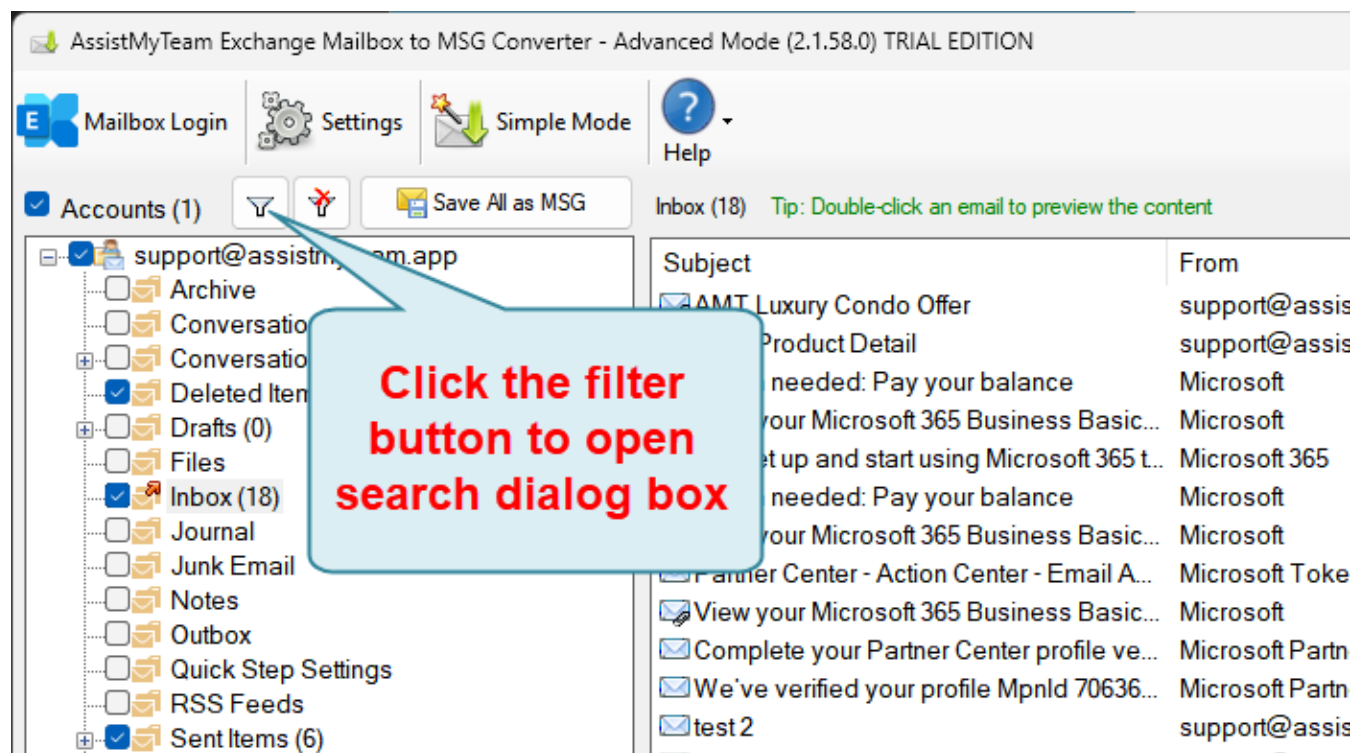

From the 'Browse for Folder' dialog box, choose a destination folder where the emails from your Exchange Inbox and other folders will be exported as MSG files.

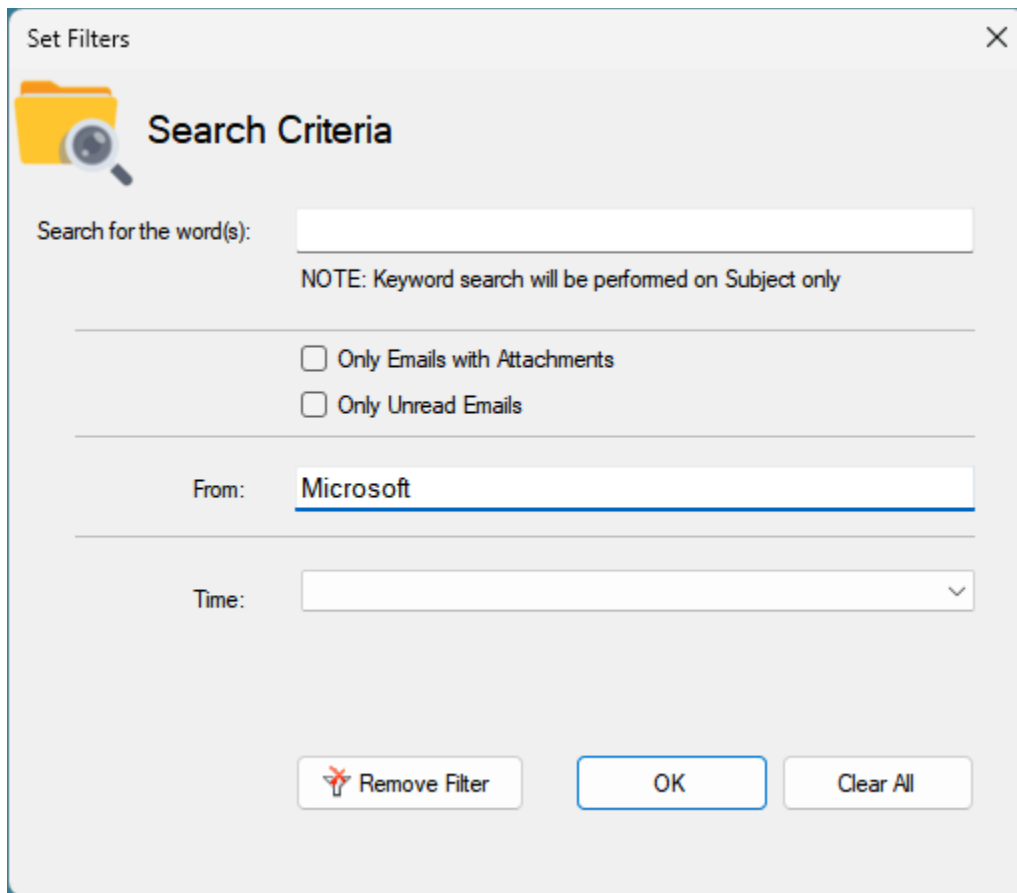

The app will recreate and retain the same original folders structure of your Exchange mailboxes in the selected destination folder of your computer to store the various exported MSG email files for easy access, sharing and filing in your local computer.

Apply keywords search and filters

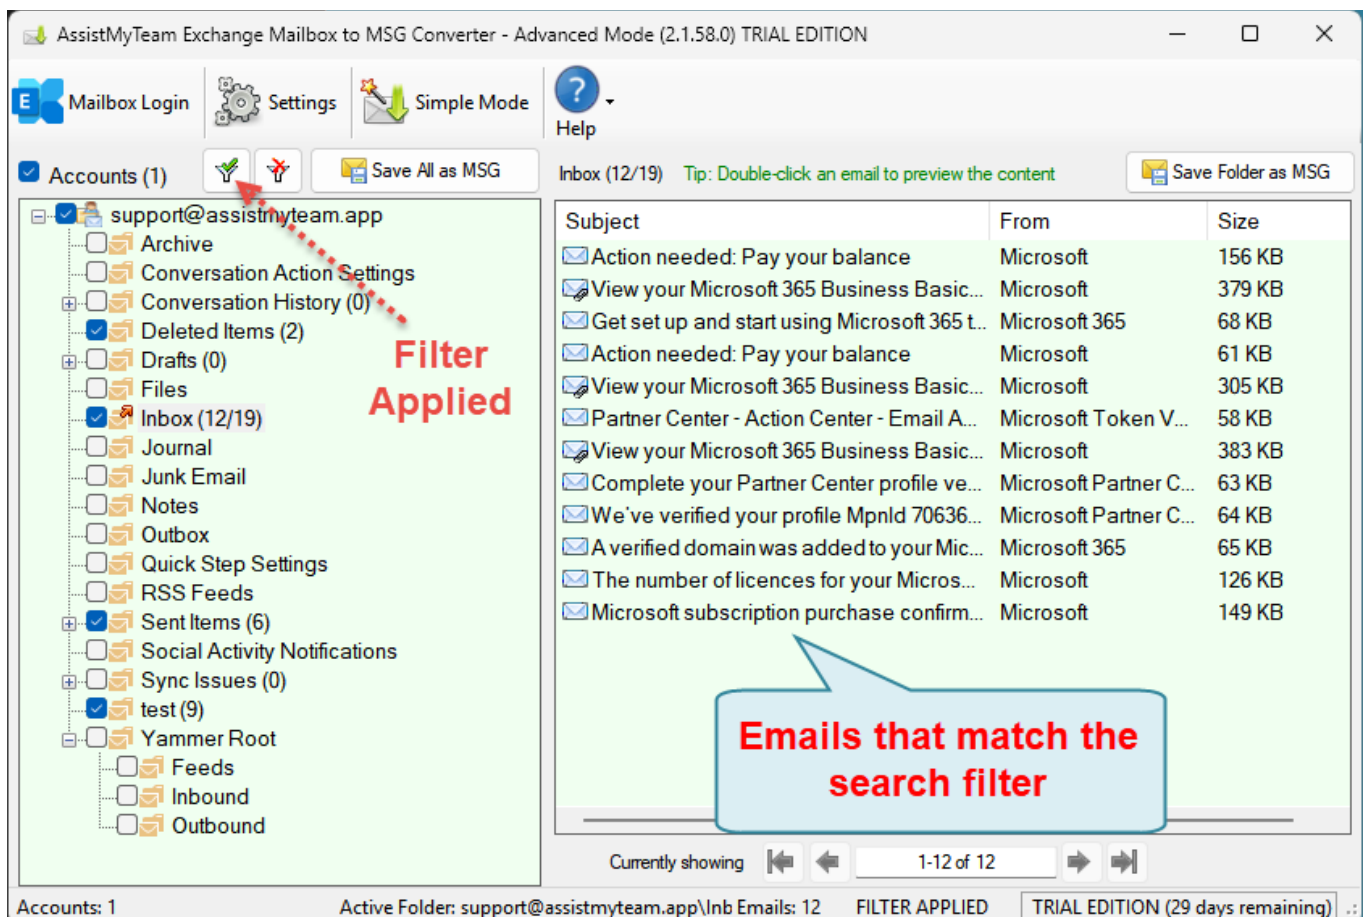

You can choose to perform a keyword search and apply filters and only perform the bulk conversions of those emails in the Exchange Mailbox account that fulfil the search parameters to MSG. To do that, click the 'Filter' button available on top of the tree-view control box.

A dialog box for the search pop ups enabling you to input keywords search in the subject or body or both. You can also filter the emails by matching the sender in the 'From' field and/or the recipient in the 'To' field. Additionally, you can specify a time duration to restrict the emails that fall between the start and end date.

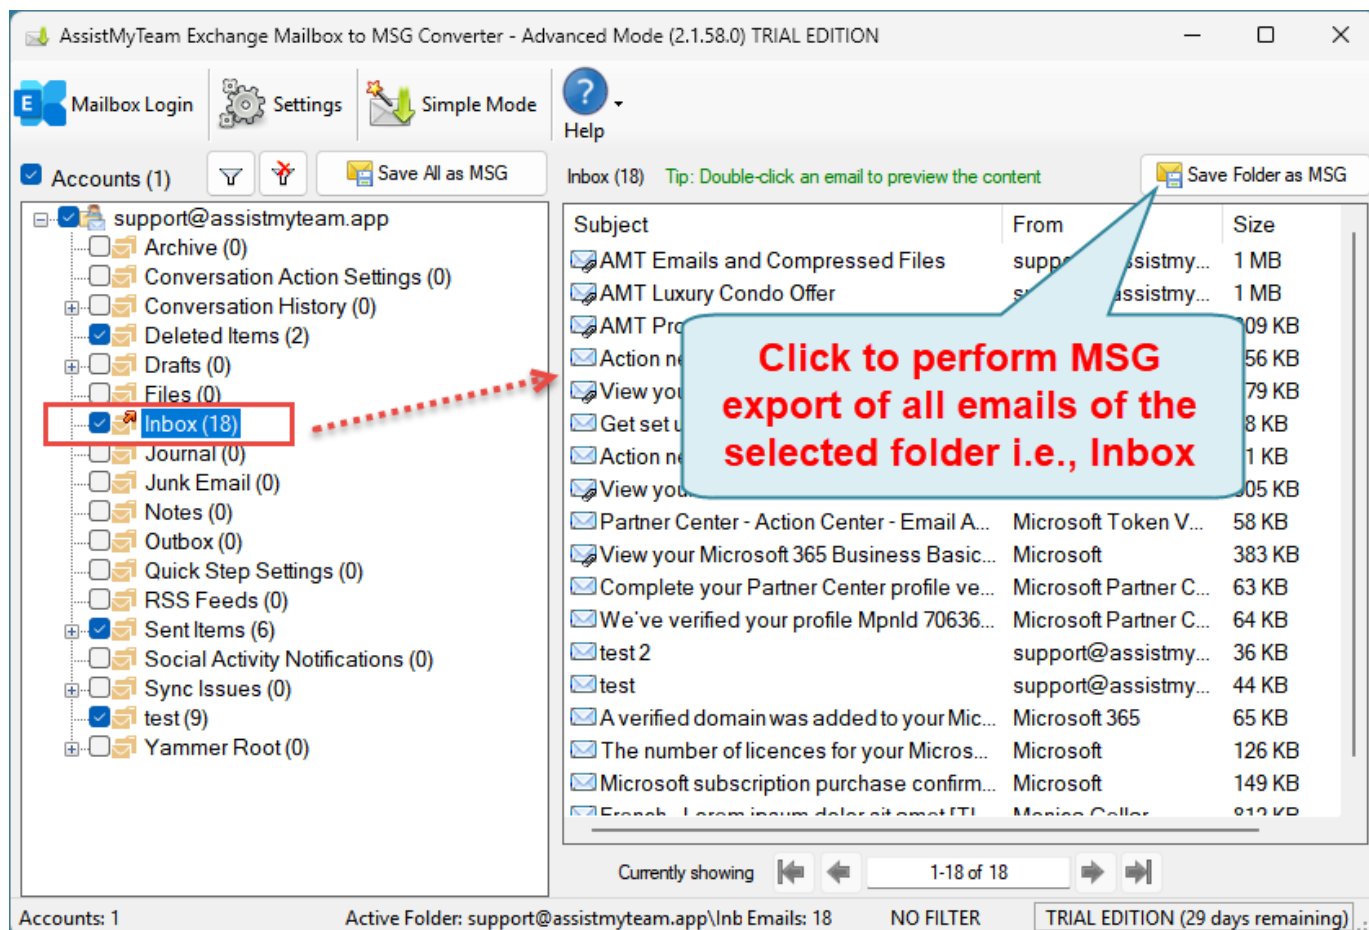

After applying the filters, the filter icon will change with a green tick mark, and the background colour of the email's container box will also be in green.

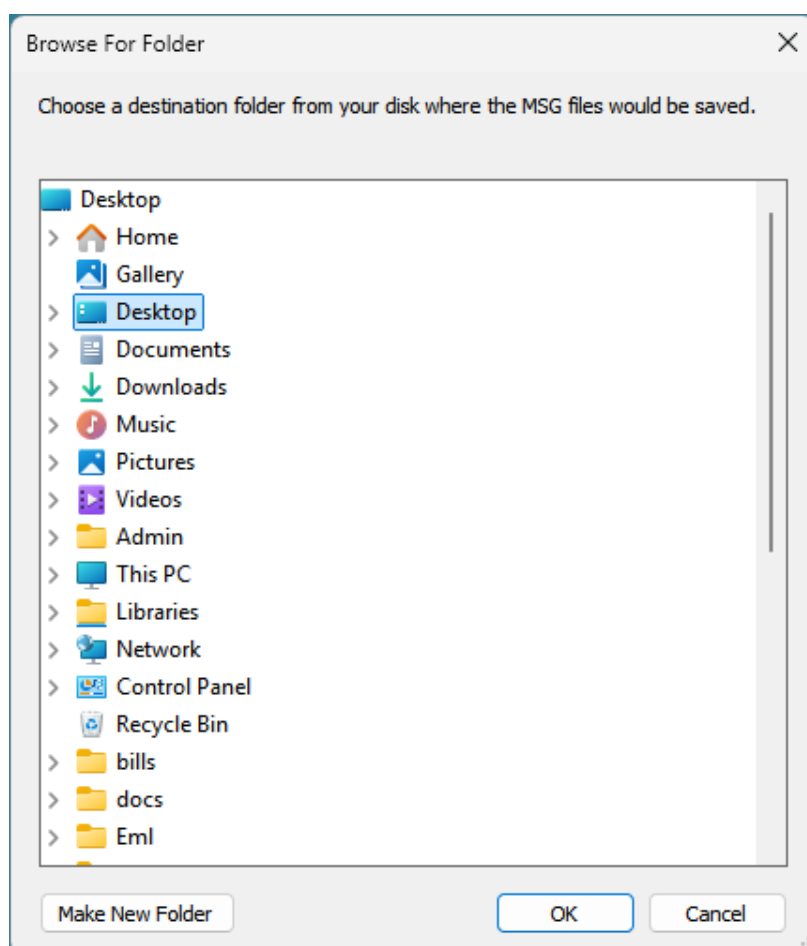

B. Convert Emails of an Exchange folder to MSG (multiple conversion)

At times, what you may need is only to convert emails of a particular folder within the Exchange Mailbox account. In such needs, you can perform the MSG conversion by clicking the particular folder from the folders tree-view control box on the left side. This will show you all the emails in the folder view control on the right side. You can then proceed to click 'Save Folder as MSG' button located on the extreme right corner of the folder view control.

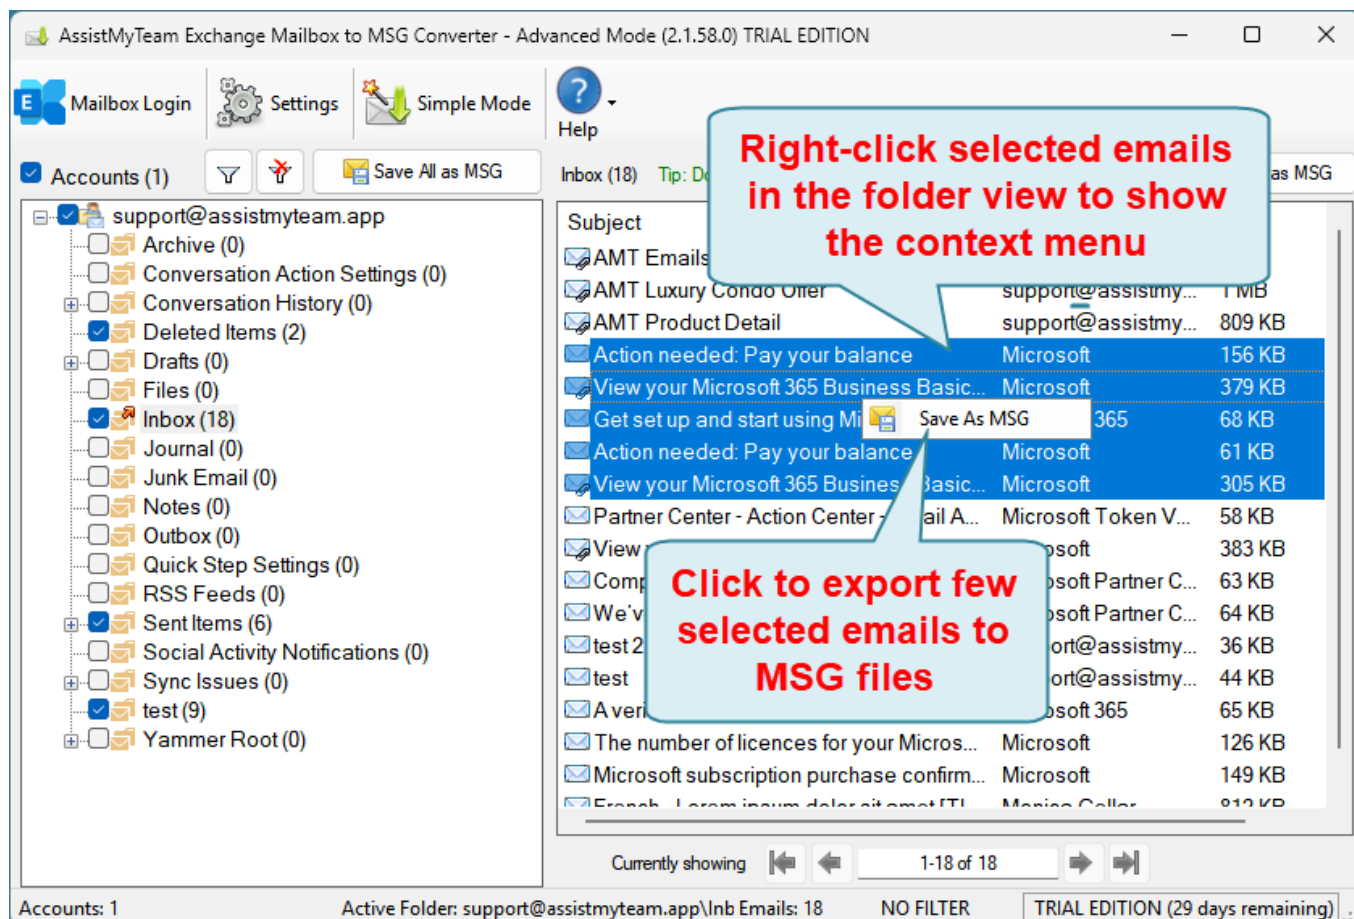

From the 'Browse for Folder' dialog box, choose a destination folder where the emails from the chosen Exchange Mailbox folder (e.g., Inbox) will be exported as MSG files.

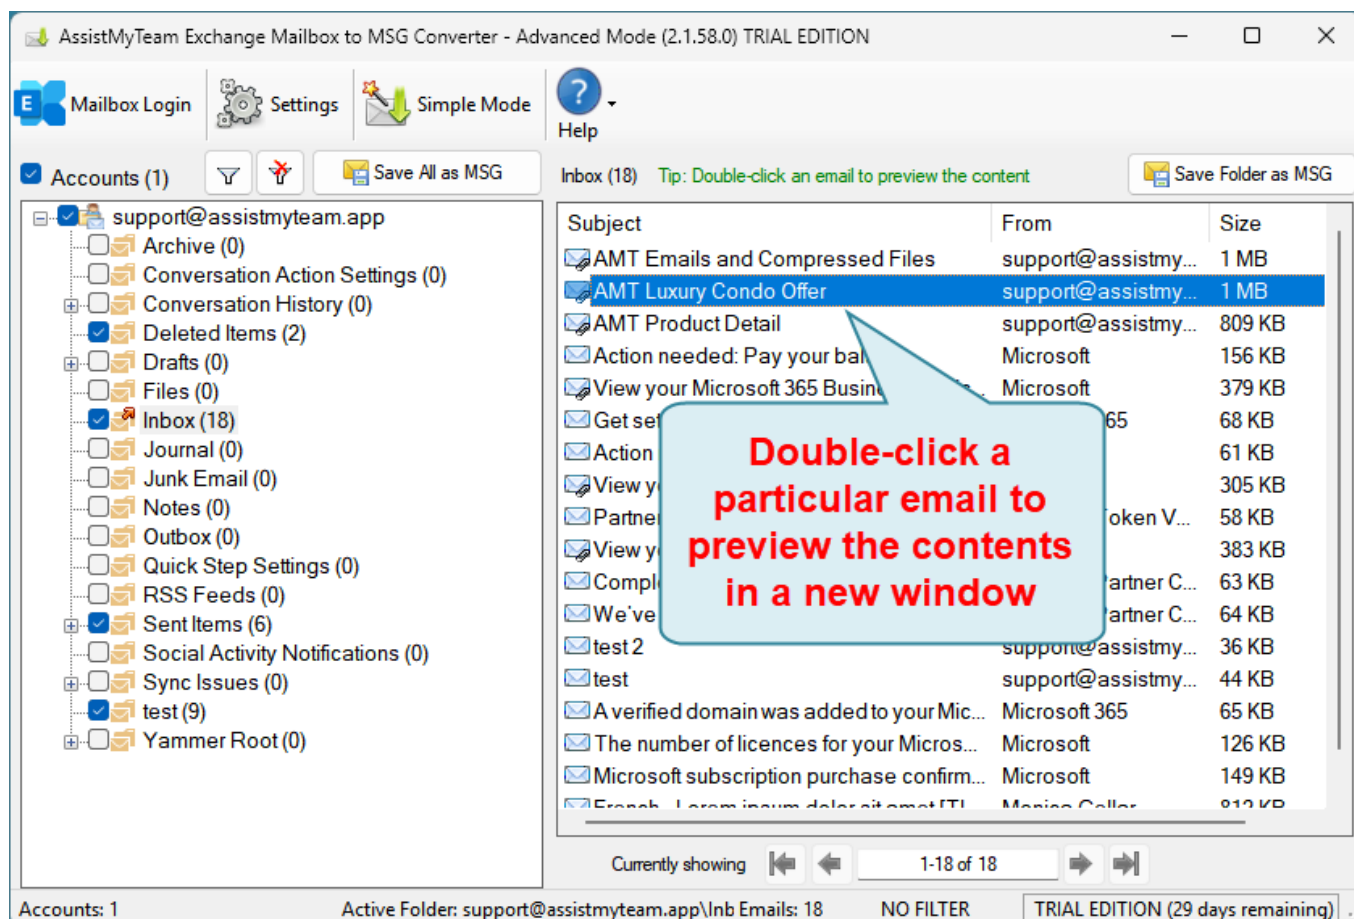

C. Convert few selected Mailbox emails to MSG files

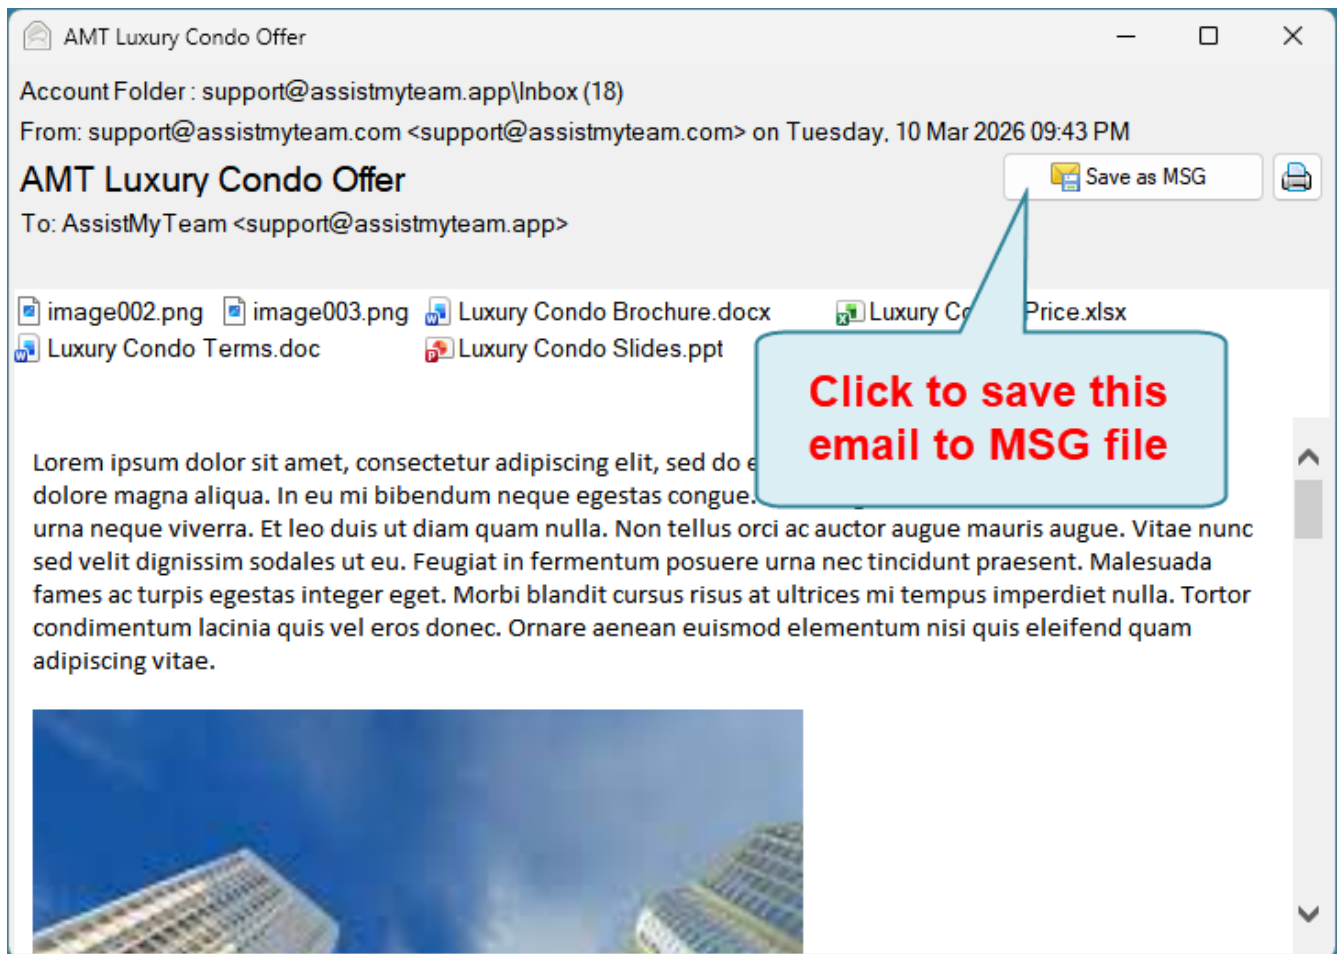

In this mode, you can export only those few emails of interest to MSG files. To do this, select multiple emails of your interest from your Inbox and right-click to show the context menu 'Save as MSG'.

When you click it, you will be prompted to choose a destination folder where the selected emails from your Exchange Mailbox folder will be exported as MSG files. Alternatively, you can preview the full content of a particular email, by double-clicking it from your Exchange folder.

This will show you the contents of the particular email in a new window.

And then choose to save the previewed email to MSG by clicking the 'Save as MSG' button located on the upper right side.
