

# AssistMyTeam PDF Splitter

## ***Installation and Configuration*** ***(‘Per User Installation’ and ‘Per Machine Installation’)***

With this guide, you would be able to quickly install and easily configure PDF Splitter app in your system.

For **‘Per User Installation’** *(ideal for standalone single user/workstation)*  
PdfSplitterSetup.zip

For **‘Per Machine Installation’** *(ideal for installing on Citrix and Terminal Servers)*  
PdfSplitterSetup-Citrix.zip

Extract these file contents to a folder.

### **NOTE: ‘Per User Installation’ and ‘Per Machine Installation’**

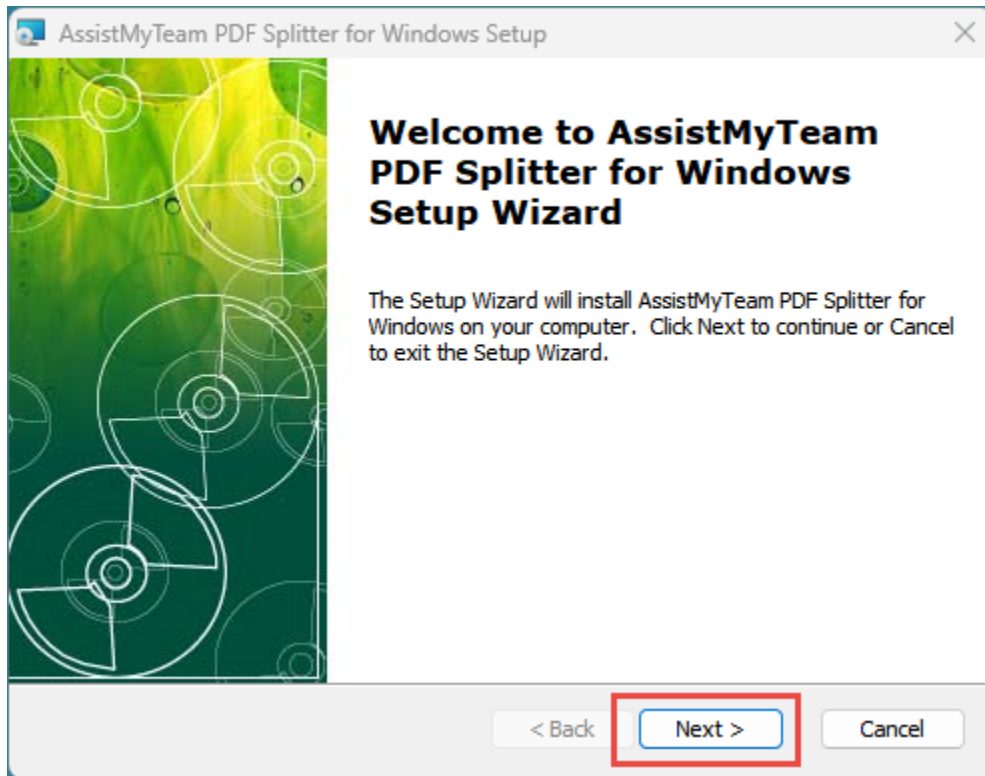

*In ‘Per User Installation’, the install is performed 100% on the local system and nothing is installed on your Exchange or Windows Server. Further, this install is intended to serve only the current logged on user of the system/workstation and will be installed under the user's application data folder (instead of Programs Files folder) and no elevated permission is required. So, there won't be a prompt from UAC to allow this install unless you change the install directory to say, Programs Files which will warrant an elevated permission/UAC prompt. If the same system is used by multiple users, each one need to install the app on their profile with the default installation folder location.*

*‘Per Machine Installation’: If you have the need to have a single install that serves all users of the system (i.e., the files will be installed under Program files folder), download the Citrix/Terminal Server version of the setups to perform a per machine installation.*

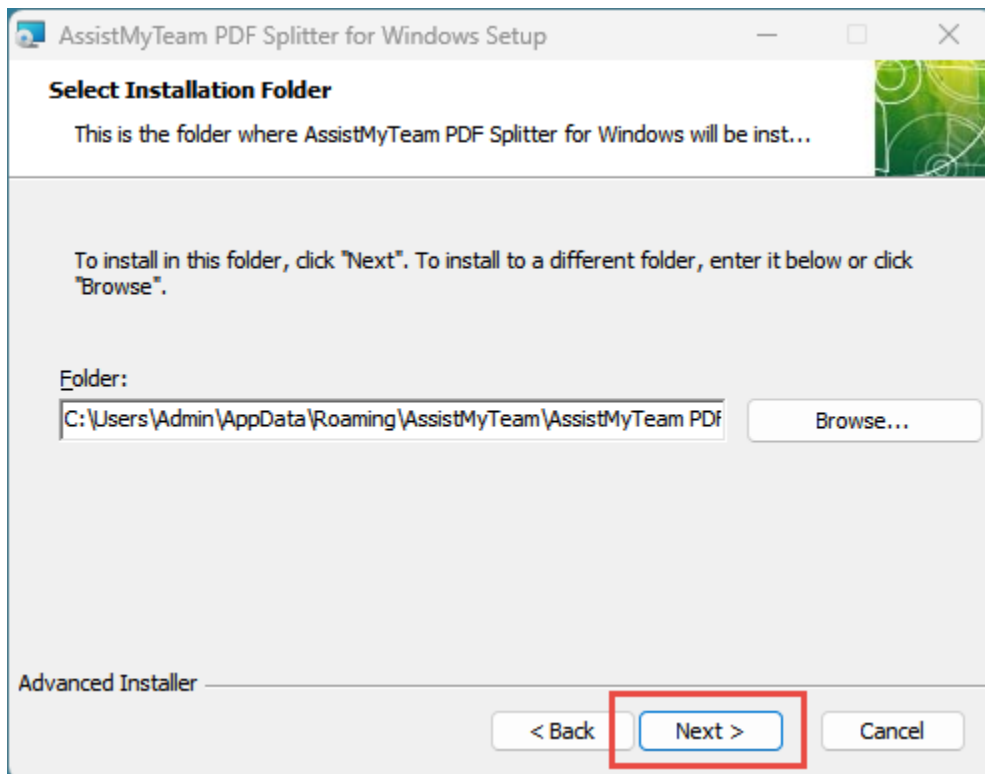

### **Requirements:**

- Microsoft .NET framework 4.8
- Windows 11, Windows 10, Windows 8.1, Windows 8, Windows 7, Windows Vista (both 32bit and 64bit are supported) and all server-based Windows 2012 and above.

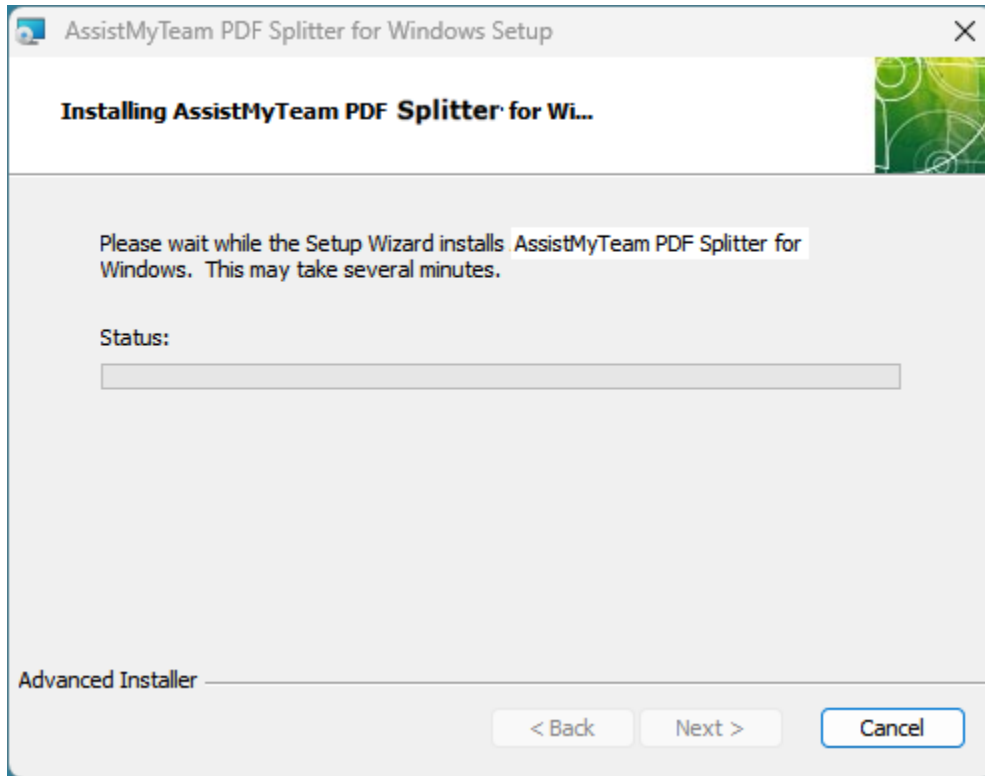

**Step 1.** Run the PdfSplitterSetup.exe to start the installation. Click 'Next' to Continue.

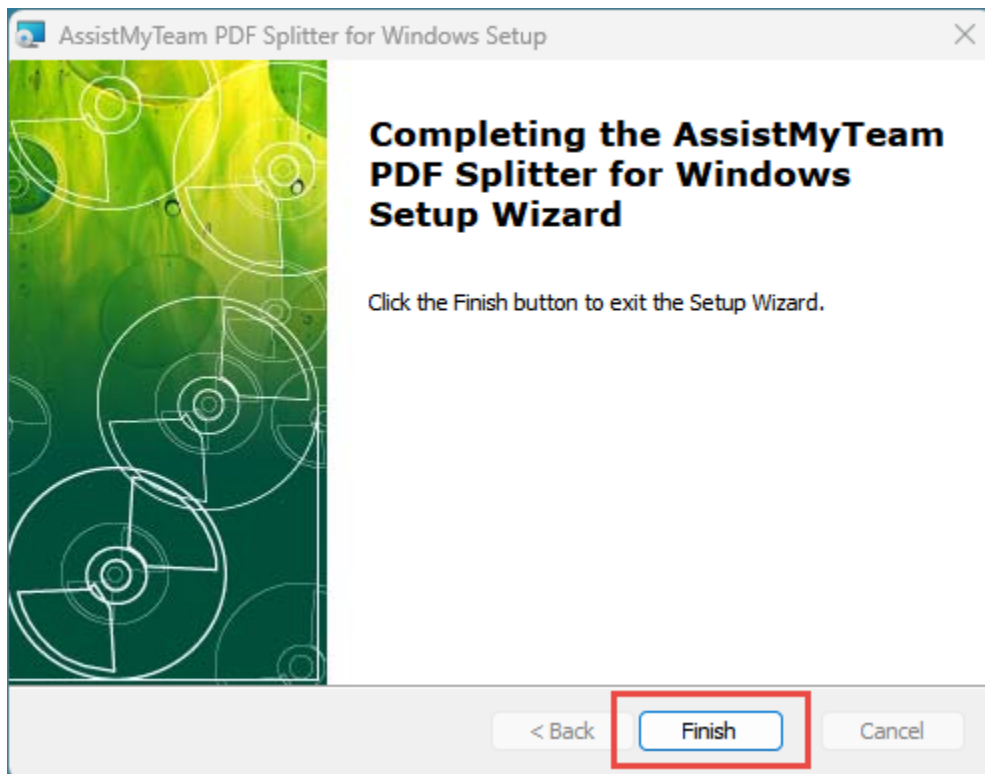

**Step 2.** Select the appropriate destination folder where the application files will be installed. If you change the default folder path, please make sure you have appropriate permission.

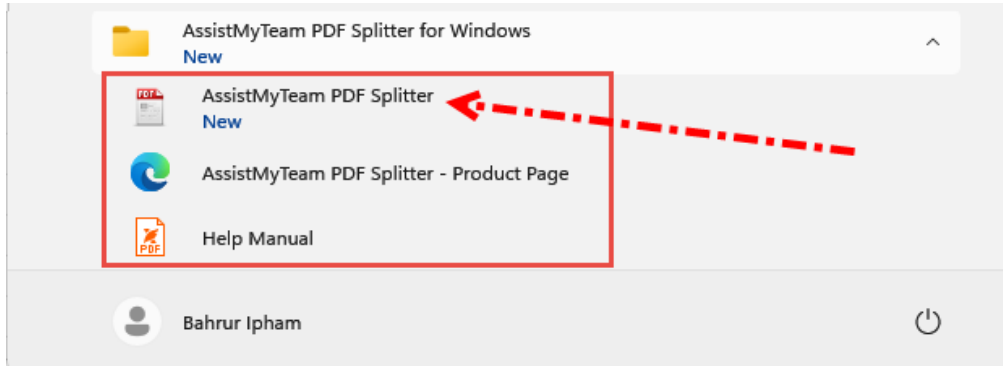

**Step 3.** Click '**Next**' to continue with the files extraction. It just takes a few minutes to complete the whole copying process.

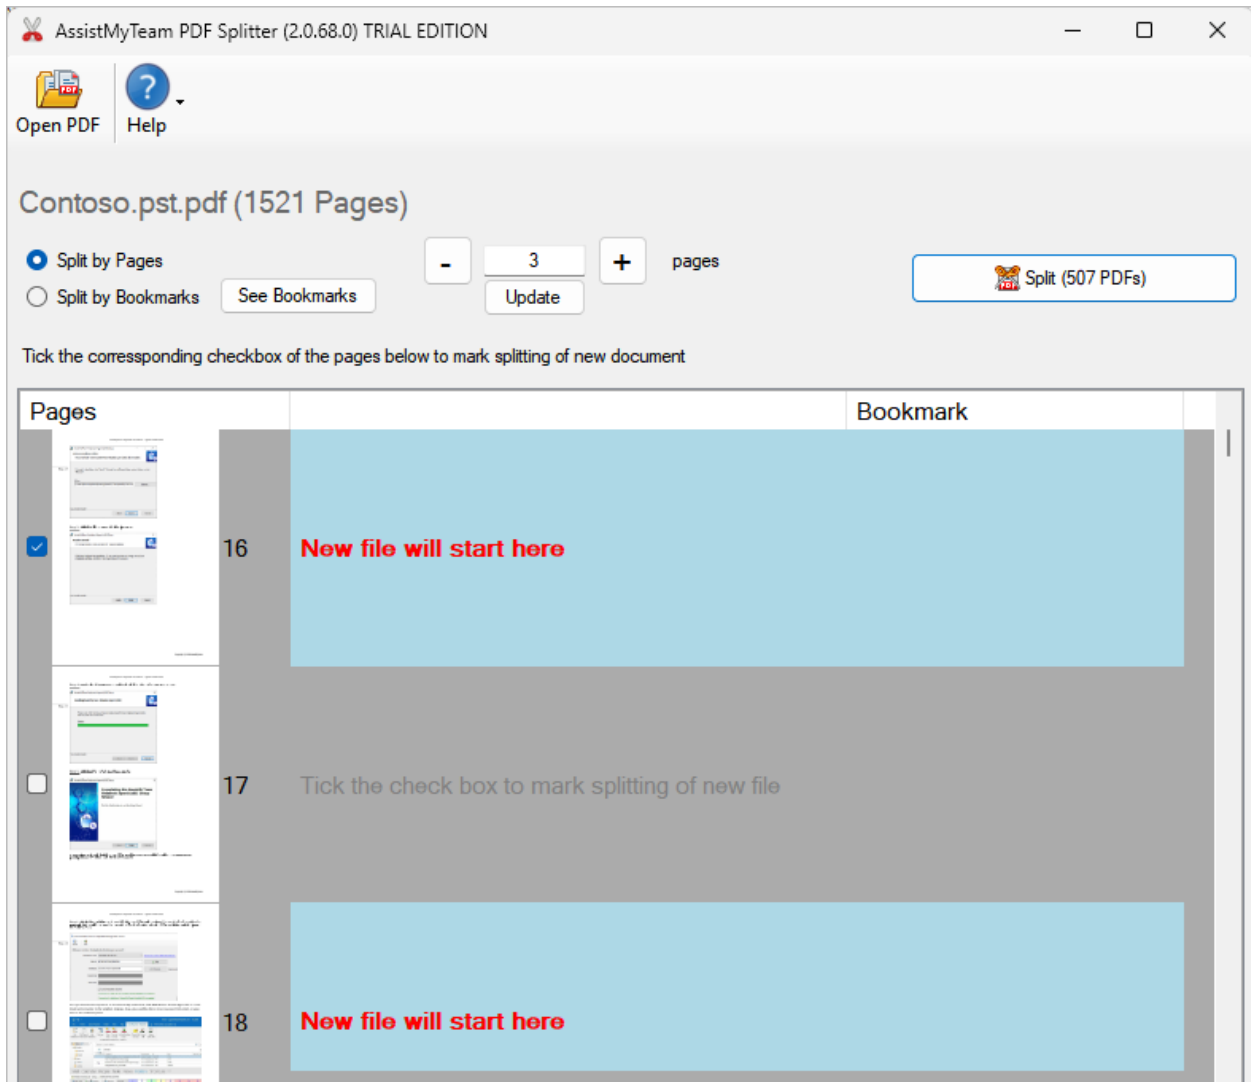

**Step 4.** Click '**Finish**'. This ends the files installation process in your system.

Now go to **Start Menu > All Apps**. If the installation was successful, you will see new menu entries **'AssistMyTeam PDF Splitter'**.

To run the app in default, basic mode, click **'AssistMyTeam PDF Splitter'** from the menu under **'All Apps'**. This will load and display the main interface of the app.

*For more references and help, refer to the PDF Help Manual, which can be invoked from **PDF Splitter app > Help > Help Topics**.*

*You can also download the full PDF help manual directly from [this link](#).*
